NSU Wireless Internet Setup (Android 10 or higher)
Phones with software below 10 may be compatible but are not officially supported by NSU.

**Step #1:** Open the Wi-Fi menu and tap the **student** network.

**Step #2:** On the EAP method menu, choose **PEAP**.

**Step #3:** On the Phase 2 authentication menu, choose **MSCHAPV2**.

**Step #4:** On the **CA certificate** menu, choose **Use system certificates**.

**Step #5:** On the Online Certificate Status menu, choose **Request certificate status**.

**Step #6:** In the Domain section, type **nsula.edu**.

**Step #7:** In the Identity section, type in your myNSU username.

**Step #8:** In the Password section, type in your myNSU password.

**Step #9:** Leave all other options unchanged and tap **Connect**.
