NORTHWESTERN STATE
UNIVERSITY OF LOUISIANA

STUDENT TECHNOLOGY FEE
GRANT PROPOSAL REQUEST FORM
FISCAL YEAR 2023-24

ALL BLANKS MUST BE FILLED COMPLETELY

Prepared by: **Debbie McInnis** for **Clinical Skills Lab**

Department/Unit: **Nursing** College: **NSU** Campus: **Shreveport**

Which NSTEP Goals/Objectives does this project meet? #3-upgrade skills lab w/modern technology

Requested equipment will be located/installed/housed? Bldg **306B** Room 213/217/219

Does the department receive lab fees? YES ✓ NO ☐

Are department property policies and procedures in place for requested equipment? **yes**

Which individual will be responsible for property control of the requested equipment?

Signature: **Debbie McInnis** Digitally signed by Debbie McInnis Date: 2023.11.01 11:27:05 -05'00' Date: **11/1/2023**

Proposal Requested Amount: **$122,468.75** Budget Attached: YES ✓ NO ☐

Email completed request to Chris Brumley at brumleyc@nsula.edu

Funding from the Student Technology Fee is allocating funds to departments and individual grants, awarded on a competitive basis, which advance the teaching/learning process within the mission of the University. All requests will be considered in this context, as articulated herein and as reflected in the unit's technology plan. Proposals should enable or enhance the ability of Northwestern students to access and assimilate large mounts of information, further their professional competence, and provide state of the art technologies in their field. The nature of, and rationale for, a request for student technology fee allocation must be consistent with the University's and requesting unit's technology plan.

- Grant applications must be submitted by November 16th at 4:00 pm
- Funding decisions will be made during the month of December 2023
- If your grant is approved by STAT, you will be informed via email

To: Student Technology Fee Grant Proposal Team

Re: Updating Nursing Skills lab

As the Nursing Skills Lab Coordinator at the Shreveport campus, it is imperative that we provide the nursing students with an updated environment that reflects the clinical settings. This lab has not had any updates for over 10 – 15 years.

These requested upgrades will provide each student , from 1st level to 5th level, the use of essential and daily equipment and supplies, that affect patient care and outcomes. It is important for students to have the hands-on ability to use the equipment in a repetitive and memorable experience, for preparation to real-life patient care. Currently, we do not have the quantity of equipment , nor up-to-date, to provide for our student census. For FY2022-2023, we had approximately 200 BSN and ASN Nursing Programs that utilized the Shreveport Skills lab.

It is our philosophy in the Clinical Lab setting that nursing students are better prepared and more confident, which is a direct reflection of our institution and the nursing profession, when they are provided with the essential tools, including book knowledge and collection of patient clinical values from essential equipment.

Our objectives include upgrading and improving access to technology used in the clinical setting, in which, students are evaluated by competency testing on each of the specific aspects of patient care, for a total of 6 graded, hands-on demonstration testing.

These objectives include competency testing for the following:
1. Vital signs – including accessing pulse, respiration, temperature and B/P
2. Central line/wound dressing change
3. Medications - including preparation, administration, evaluating, patient education and documentation.

4. Foley - all aspects of urinary elimination, including insertion, discontinuation , patient education and documentation.
5. Physical assessment - complete head-to-toe patient assessment and documentation.
6. Comprehensive competency - includes all of the above ,utilizing critical thinking skills to identify patient needs and ability to prioritize.

The equipment that needs to be available, along with updating, includes the following:

1. Vital signs monitoring - currently only have 1 mobile V/S machine which has now become obsolete and will no longer take the B/P.
2. Headwalls to include Oxygen, air, and suction capabilities. Currently, I only have 6. These are standard patient equipment in every patient room and the lab should reflect this expectation for practicing.
3. IV pumps- Currently, I only have 2. These pumps are essential and students need to learn how to use these in an precise and confident manner.
4. Sequential Compression Device (SCD) - Currently, I only have 1 and it is very old. These have become standard practice too since the patient's chance of an emboli increases during their hospital stay.
5. Computers, keyboards, scanners & mouse to be utilized for EHR access during patient's clinical stay. This is the norm for all patient rooms.
6. Whiteboards such as Promethean, can be utilized by all Faculty during Skills lab, that allows projected images from the computer while emphasizing key points to highlight which will assist in interactivity between students and their education.

I have attached quotes from the various vendors. The equipment should have a life expectancy of 5 – 10 years without any anticipated upgrades. All vendors are state approved since I currently order from these vendors for each semester student's lab supplies. The lab is under the direct supervision of myself and Faculty. Students are not left alone in the lab. Lab is kept locked during closed hours.

I utilize my budgeted allowance for undergraduate supplies which consists of all lab disposable items such as medication and IV kits for all students (including 1st and 2nd level), foley kits, wound care/Central line dressing kits, vital signs, bedside patient care, otoscope/opthalmoscope, neuro checks, musculoskeletal checks, ostomy, handwashing, PPE, restraints, SCD/TED, mobility, plus other supplies to maintain stock/inventory for all of the campuses, including Shreveport, Natchitoches, Alexandria Rapides, Alexandria Airpark and Leesville.

The upgraded equipment requested is costly and would consume more than my budgeted allotments , but, these upgrades should last and can be utilized for many years.

The quotes included are from approved vendors such as Pocket Nurse, Medline, Trafera, IT support , Amazon and Dell, for review.

I will be responsible for implementing this lab upgrade plan and will utilize the Nursing Faculty for their input to ensure that these plans reflect our goals and objectives to provide our Nursing students with the supplies, equipment and knowledge needed to be successful as a Nurse providing the best patient care with the best possible patient outcomes.

Thank you for your consideration,

Debbie McInnis RN BSN CNOR-E

Debbie McInnis RN BSN CNOR-E   11/9/23

NORTHWESTERN STATE
College of Nursing and School of Allied Health
Office of the Dean

November 1, 2023

RE: Nursing Lab Upgrades

Good afternoon,

As the most comprehensive nursing program in the state, it is imperative that the nursing skills labs at Northwestern State be equipped with the most up-to-date equipment possible. Students rely on lab equipment to be prepared for their clinical rotations. As such, there are several initiatives that the College of Nursing and School of Allied Health would like to begin to modernize the existing labs.

First, we would like to consolidate the number of nursing beds in the Shreveport lab to simulate the hospital experience more accurately. Each lab station will need to be equipped with a hospital bed, manikin, monitor, EHR computer w/mouse/scanner, SCD machine, V/S machine, headwall w/O2, air, suction, IVAC, sharps and gloves on the wall. This will give the nursing student a visualization and realization of a real patient room so that they become familiar with the equipment and know their way around the room.

In addition to the skills lab upgrades, we would like to implement the use of smartboard technology to improve faculty teaching methods. This will provide an opportunity for faculty to share information in real time to the students on all campuses.

Finally, we want to implement virtual anatomy and virtual reality as part of the nursing education experience. By transferring the existing Anatomage table from the library to the nursing skills lab, we can ensure that more students and faculty have access to this virtual technology. Further, CONSAH has invested in virtual reality equipment that will be used to enhance the lab experience for students.

While we know that these initiatives will require some costs, we feel that it is paramount to modernize the nursing skills lab to provide the best possible outcomes for students, while also staying competitive with other nursing programs in the area.

I look forward to working with you in pursuing these upgrades.

Very best regards,

Dr. Joel Hicks
Dean, College of Nursing and School of Allied Health

DEDICATED TO ONE GOAL. **YOURS.**

Phone: 318-677-3100 | 1-800-454-9567 | Fax: 318-677-3127 | nursing.nsula.edu | nursing@nsula.edu | 1800 Line Avenue | Shreveport, LA 71101

Nov. 16, 2023

To whom it may concern:

As the department head of the nursing programs, I strive to ensure that our students are provided with up-to-date information and resources that best mimic what they will see in our area clinical agencies. Over the last few semesters, we have received concerns from students describing the discordance between what is encountered in our simulated laboratory practice and their face-to-face clinical practice. The comments center around missing common equipment that is seen in all patient rooms and include: IV poles and pumps, oxygen and suction outlets, pulse oximetry monitors, computer access to electronic medical records, mounted glove boxes, and mounted sharps containers.

We are asking for grant funding to be awarded so that these items may be purchased. and our simulated laboratory upgraded. Thank you for any consideration you can give our students.

Sincerely,

Anna Morris, DNP, RN, CNE

Debbie McInnis

Historically, anytime there is a department specific initiative, the department would buy the switch. This would go before the CIO before any purchases would be made for his call on it though.

Your cost for 13 cable drops will be $4391.47 — *Will need x 26 cable drop = $8782.94*
I will generate the itemization for you so you can send it to Erika to generate the PO once everything is settled.

The cabling is the easy part. Prior to moving forward the software, and its requirements will need to identified, and documented. The room layout may call for different port locations, the equipment may present additional issues. The problems could be vast and varied. As for my section. I've provided both the cabling cost and list of potential port reclaims.
Once the 13 ports have been identified for removal, I will prepare them for use.
Once the project has a more defined scope and requirements we can move forward with the wiring.

Thanks!
