Grader Report Options Available

Show/hide toggles	**Show column averages**—Adds a row that shows the average for each grade.
	Show user profile images—Sets whether or not the user's image is displayed.
	Show ranges—Adds a row for displaying categories and grade items.
Special rows	**Grades selected for column averages**—Excludes or includes cells with no grades in the averages.
	Show number of grades in averages—Includes the quantity of grades that were used in brackets next to the average.
General	**Quick grading**—Enables the teacher to edit multiple grades at one time. This prevents the grade from being edited through the activity.
	Show only active enrollments-Only show students that are active in the course (see Participants area of course)
	Aggregation position—Displays the category and course total first or last in the gradebook.
