

**MEMORANDUM of UNDERSTANDING  
BETWEEN  
LOUISIANA DELTA COMMUNITY COLLEGE  
AND NORTHWESTERN STATE UNIVERSITY  
June 22, 2009**

**PURPOSE**

This Memorandum of Understanding (MOU) summarizes an educational partnership agreement between Louisiana Delta Community College (Delta) and Northwestern State University (NSU) to provide undergraduate educational opportunities for students who may attend both institutions. Both institutions are committed to seamless transfer so students may successfully complete their academic goals. This agreement ensures that each institution serves the needs of students by providing them with appropriate and accurate transfer and advising information. Specifically, the MOU addresses both course and program transfer and articulation agreements.

**GOALS**

**The goals of this agreement are to:**

- improve the transfer and advising process for the benefit of students.
- develop an Expanded Course Articulation Crosswalk.
- identify high-student interest degree programs at each institution and develop specific degree program articulation agreements (i.e., 2+2, or course-by-course).
- identify faculty members in each program who will coordinate and serve as advisors for students transferring in designated programs.
- improve collegiality and communication among college and university discipline faculty and administrators.

In order to facilitate and improve the transfer process for our students, Louisiana Delta Community College and Northwestern State University hereby enter into the following agreement:

## PROVISIONS OF ARTICULATION AGREEMENT

1. The institutions will develop and maintain an Expanded Articulation Crosswalk, to include those courses listed in the *Statewide Student Transfer Guide and General Education, Business, and Science Articulation Matrices*, as well as those courses commonly transferred which are not included on the *Matrix* to improve the transfer process for the benefit of students (Appendix A). **In some cases, 200(0) level courses may be accepted for 300(0)-level upper level courses; however, this may be not acceptable for specific majors.**
2. The institutions will develop common degree plans by major and will clearly delineate courses to be taken at Louisiana Delta Community College (DELTA CC) and those to be completed at Northwestern State (NSU). These specified, individualized plans will be an informal contract between the two institutions and the students who choose to participate. These plans will guarantee to the DELTA CC student that the prescribed courses may be used toward a specific degree plan at NSU (see Appendix B for designated degree plans).
3. The institutions will create a dual admissions program for the 2+2 degree programs (2 year associate degree earned at community + 2 years of study at the university resulting in a baccalaureate degree). Students admitted into DELTA CC, who choose an approved common degree plan and who meet all NSU admissions requirements, will receive automatic admission to NSU upon satisfactorily completing an Associate of Arts, Associate of General Studies or Associate of General Science 2+2 degree plan with a minimum cumulative GPA of 2.0 (on a scale of 4.0). All courses and grades will transfer for GPA purposes; only courses with a grade of C (2.0) or better will be accepted by NSU. This dual admission component refers to university admission only. Other offices and programs, such as Financial Aid and Teacher Certification, may specify additional requirements.
4. The specific degree plan will be developed for each student as an informal contract with the student which will be valid providing the student completes all degree requirements at NSU within six (6) years of the date of the NSU catalog selected. An "Intent to Transfer" form must be completed, signed by the student, and signed by a representative of both institutions to serve as the student's written guarantee of retaining the curriculum in effect on the date signed.
5. The Expanded Articulation Crosswalk and degree program articulations will be reviewed annually by the Chief Academic Officer or designee at each institution. The institutions may add new courses and edit course offerings when necessary to improve student transfers between institutions.
6. The institutions will engage in joint marketing efforts to promote the articulation partnership. Promotional efforts will include, but are not limited to, links on respective websites for placement of articulation agreements, information in the institutional catalog, and transfer information in other college/university publications.

7. DELTA CC will make available a list of graduates and their corresponding degree programs and mailing addresses upon request of the receiving university in an effort to avail and encourage graduates to further their higher education at a 4-year institution.
8. The institutions will strive to meet annually with the university and college discipline faculty and administrators. These meetings will be directed by the chief academic officer or designee.

### TERMS

This agreement shall be effective on June 22, 2009 and shall continue until terminated by either party giving one year written notice to the other party in order to protect all students transferring between institutions.

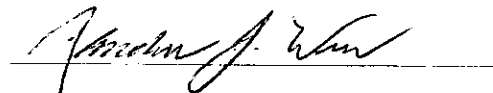

### NOTICE

Any changes to this Memorandum of Understanding must be in writing and delivered by certified mail or by personal delivery to the person to be notified.

In witness whereof, the authorized representatives of the parties have executed this agreement on the 22<sup>nd</sup> day of June, 2009.

*\*These are upper level courses. There must be an agreement stating that this is acceptable for specific majors only*

*++Please note that Delta's Anatomy and Physiology courses are taught as combinations. If a student takes only BIOL221 (A&P I) they do not have the equivalent of BIOL2220, only a partial course of anatomy and partial physiology. NSU College of Nursing will not accept this and NSU's Biology department has agreed that the student must take the entire sequence of A&P I and A&P II to have the full equivalency of BIOL2220, 2221 AND 2230,2231.*
