Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Michael Bodri Department Biology

College or Unit: Science and Technology Campus: Natchitoches

Submitted to: J. Long for A. Sybert Date 8/24/05 Fiscal Year: 05-06

1. Describe target audience.

NSU Students located on the Natchitoches Campus.

2. Describe project/initiative for which you are requesting funds.

Upgrades to the teaching laboratories in Kyser Hall for microbiology classes, particularly MBIO2061. Specifically we request 21 teaching microscopes, 2 digital projection microscopes, 2 refrigerators (for culture storage to replace broken ones), and 6 hot plate stirrers for media preparation.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

Faculty evaluations will "improve" (the funds will be used to purchase needed microscopes and other supplies for the labs— instructors often get evaluations from students with scores reflecting their frustration with having to share equipment.

4. Indicate how each project objective will be evaluated.

Faculty evaluations from the semester in which the new teaching microscopes are introduced will be compared to past evaluations to determine student satisfaction. In addition to teaching microscopes, we are also requesting two (2) digital projection microscopes to allow students and faculty to share images via a monitor or digital projector. Student scores on practical examinations should improve if they are exposed to more than just their own slide images. I propose to have one lab taught without the use of the digital microscopes and compare their practical scores to the sections where the digital scopes are used.

Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

Currently, students share microscopes in lab (3 students/scope, class size is typically 32). The purchase of 21 scopes will allow each student to use their own instrument. We have 5 sections this semester with over 150 students. Last academic year we enrolled 252 students, 268 in 2003-2004 and 272 in 2002-2003. Biology, nursing, medical technology, and vet tech students are all required to take this class.

5. How will funding of the project advance the University and College / unit technology plan?
Students currently share equipment. Nurses and physicians, other allied health professionals, biological researchers frequently work with microscopes to examine specimens. The more hands-on experience received, the better qualified the graduate for positions requiring such skills. The University specifically desires to produce a trained work force in the area of biotechnology. This laboratory equipment directly impacts training in this field.

6. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.
Drs. Joubert, Land and Orrett, with direction from Bodri, will implement the project. The 3 faculty are all trained and credentialed microbiologists with experience in teaching the labs for which the equipment is requested.

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

N/A

9. Provide a schedule for implementation and evaluation.
Equipment will be used immediately upon arrival.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.
Microscopes typically last 5-10 years depending upon quality and usage. The refrigerators have an anticipated life of 10 years. The hot-plate stirrers 6 years.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

Proposed Budget			
<u>Number</u>	<u>Item Description</u>	<u>Vendor</u>	<u>Unit Price</u>
2	DigiVu 2.0 Digital Microscope HT-59-1300	Carolina Biological Supply Company	\$ 1515.00
21	Nikon YS100 microscope MCA51201	Nikon Instruments Inc.	\$ 992.10 ¹
6	Corning Hot plate Stirrer SS41001-D	LSU University Stores ²	\$ 324.22
2	Frigidaire Top freezer refrigerator	Sears	\$ 499.00
TOTAL			\$ 26807.42

¹Please see the attached bid for a complete breakdown of this price per microscope.

²LSU University Stores has state contracts in place for all items ordered through their catalog. The departmental account with LSU university stores is MOT-00-0965.

How Proposal Supports Unit Resources

The department recognizes that a large number of students are serviced by MBIO2060. As such, funding of this proposal will allow reallocation of funds to upgrade the laboratories in other areas specifically:

New seating is required in one class;

Multimedia media projectors need to be installed in both classrooms;

Glassware must be replaced;

The cost of consumables has increased exponentially necessitating sharing among the students – lab fee money will be freed up for purchase of materials.

Microscopes

Digital

DigiVu™ Contour CVM Microscope

- Automatic white balance functions
- Monocular head with 10× widefield eyepiece
- Connects to a computer and/or a TV/monitor for independent or simultaneous viewing
- 4×, 10×, 40×, oil-immersion 100× objectives; the 40× and 100× objectives are spring loaded
- Reversed nosepiece objectives rotate out of harm's way, providing better stage access
- Slip clutch, travel stops, and tension adjustment on focus mechanism
- Separate coarse- and fine-focus adjustments
- Abbe condenser with spiral-sleeve movement
- Iris diaphragm with protective shield and filter holder
- Built-in mechanical stage with low-position coaxial controls
- In-base, variable intensity halogen illumination
- Sturdy metal base; microscope measures 14" H × 7" W × 8" D; wt, 11 lb

Includes Windows® 98-, 2000-, ME-, and XP-compatible Motic® Images 2000 software. A Macintosh® OS 9.1 version of this software is also included. Complete with S-video capability as well as RCA and USB cables. With dust cover, and software quick-start guide.

HT-59-1272 Each \$1,249.00

HT-59-1272 Wolfe DigiVu Contour CVM Microscope

HT-59-1300 Wolfe DigiVu 2.0 Research Digital Microscope

New!

DigiVu™ 2.0 Research Digital Microscope

Grades 9–College:

Wolfe's highest resolution digital microscope combines a built-in, 2.0-megapixel camera with a research-level microscope. An excellent choice for advanced and college-level studies. Microscopic images up to 1,600 × 1,200 res can be captured and edited with the included Motic® 2.0 Multi-Language software. Windows® compatible. System requirements: Pentium® III or equivalent, 1 GHz or higher; 1 GB hard disk space; 256 MB RAM; 32 MB display memory; Windows® 2000 or XP.

- Binocular head with 10×, 18-mm widefield eyepieces
- High-quality achromatic super contrast 4×, 10×, and 40× spring-loaded objectives and 100× spring-loaded, oil immersion objective
- Coaxial coarse- and fine-focus adjustments
- Built-in mechanical stage with low-position coaxial controls
- Focusable, 1.25 N.A. Abbe condenser
- Iris diaphragm with filter holder
- Halogen illumination (12 V, 20 W) with intensity control
- USB 2.0 connection, includes 2.0 PCI card
- Size, 15" H × 7" W × 9" D; wt, 15 lb

HT-59-1300 Each \$1,515.00

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Tommy Tilley & Juanita Darby Department Math

College or Unit: Math Campus: Leesville/Fort Polk

Submitted to: _____ Date 08/17/05 Fiscal Year: 2005-2006

1. Describe target audience.

NSU Students located on the Leesville/Ft. Polk Campus.

2. Describe project/initiative for which you are requesting funds.

To upgrade modems on the Leesville/Ft. Polk campus.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

To upgrade the dial up services available to students living in the Leesville/Ft. Polk campus area to match the same speed available to other NSU campuses.

4. Indicate how each project objective will be evaluated.

Network administrator, Steven Hoover, will run a daily use log. The Leesville/Ft. Polk Technology committee will review the daily use log to evaluate the average number students using the dial up system.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

The present modems available for student dial up are 28.8K. It is important for the students located in the Leesville/Ft. Polk area to be able to connect to the network at the same speed available to the other campuses. Many students living in this area take internet courses and need this connectivity to participate in internet classes effectively.

6. How will funding of the project advance the University and College / unit technology plan?

The objective continues to support the five year technology plan instituted by the University by establishing equivalent access to technology on the Leesville/Ft. Polk campus.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Steven Hoover with Telecommunication

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

none

9. Provide a schedule for implementation and evaluation.

Once approved, equipment will be ordered immediately and normally takes 4-6 weeks for delivery.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

Hardware expected life is 5-7 years. Software upgrades are included in the service contract through the same version. A software upgrade to the next version may be necessary in three to four years.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

BUDGET

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Tommy Tilley & Juanita Darby Department Math

College or Unit: Math Campus: Leesville/Fort Polk

Submitted to: _____ Date 08/17/05 Fiscal Year: 2005-2006

1. Describe target audience.

All NSU Students attending the Leesville/Ft. Polk Campus.

2. Describe project/initiative for which you are requesting funds.

To purchase an interactive message board for the Leesville/Ft. Polk campus.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

Determine the number of sites accessed by the Leesville/Ft. Polk students.

4. Indicate how each project objective will be evaluated.

A web counter will be used to determine the number of visits students make to each site. This count will be reviewed by Leesville/Fort Polk Technology committee.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

The present time information is disseminated by posting information on bulletin boards and announcements. This method has proven to be ineffective, especially with the nontraditional students who attend night classes.

In an effort to appeal to more students and make information readily and consistently available, Leesville/Ft. Polk is requesting an interactive message board. The interactive message board would be placed in a prominent location where students will have easy access. This media source would make information available to all students after regular hours, especially the nontraditional students who only attend night classes. The interactive message board would be a great enhancement to the Leesville/Ft. Polk campus.

7. How will funding of the project advance the University and College / unit technology plan?

The objective continues to support the five year technology plan instituted by the University by increase communication with students on the Leesville/Ft. Polk campus through technology.

8. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Tommy Tilley, Senior Technical Support Specialist.

9. Describe any personnel (technical or otherwise) required to support the project/initiative.

Carpenters and electricians might be necessary.

10. Provide a schedule for implementation and evaluation.

Once approved, equipment will be ordered immediately and normally takes 4-6 weeks for delivery. All services should be available to students for start of Spring Semester.

11. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

Hardware expected life is 5-7 years. Software upgrades are included in the service contract through the same version. A software upgrade to the next version may be necessary in three to four years.

12. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment.

Leesville will purchase the software necessary for the interactive message board.

Image Max V-View Angle: 170°

Analog Video Signal: RGB

Audio Output: Speaker(s) - integrated

Cable(s) included: 1 x 15-pin D-sub Analog VGA video display cable, 1 x 24-pin DVI cable, 1 x standard power cable, 1 x audio cable, 1 x USB cable

Color Support: 24-bit (16.7 million colors)

Compliant Standards: FCC Class B certified, CE, CSA, UL

Device Type: Flat panel display / TFT active matrix

Device Type: Touchscreen LCD Monitor

Dimensions (WxDxH): 17.4" x 9.0" x 17.2"

Dimensions (WxDxH): 44.2 cm x 22.9 cm x 43.7 cm

Enclosure Color: Black
Image Brightness: 250 cd/m2
Image Brightness: 250 cd/m² (typical)
Image Color Temperature: Adjustable
Image Contrast Ratio: 500:1
Image Contrast Ratio: 500:1 (typical)
Input Device: Touch-screen
Max Resolution: 1280 x 1024
Max Resolution: 1280x1024 pixels (XGA)
Max Sync Rate (V x H): 75 Hz
Port(s) Total (Free) / Connector Type: 1 x 15-pin D-sub VGA, 1 x 24-pin DVI , 1 x USB hub (2+1), 1 x USB for touch screen, 1 x Audio
Power: AC 110/230 V (50/75 Hz)
Power Consumption Operational: 60 Watt
Speaker(s): Integrated stereo speakers with 1 W/channel
Type: Speaker(s) - integrated
Type: Touch-screen
Voltage Required: AC 110/230 V (50/75 Hz)
Power Consumption Stand by / Sleep: 5 Watt
Movement Detection Technology: Capacitive
Compatibility: PC
Compatibility: PC/Mac
Response Time: 25 ms
Display Screen Coating: Anti-glare
Flat Panel Mount Interface: 100 x 100 mm
Controls / Adjustments: Mute, volume, brightness, contrast, H/V position, sharpness
Product Description: Planar PT191MU - flat panel display - TFT - 19"
Cables Included: 1 x VGA cable | 1 x audio cable | 1 x USB cable | 1 x DVI cable
Interfaces: 1 x audio line-in - mini-phone stereo 3.5 mm | 1 x VGA - 15 pin HD D-Sub (HD-15) | 1 x USB - 4 pin USB Type B | 2 x USB downstream - 4 pin USB Type A | 1 x USB upstream - 4 pin USB Type B | 1 x DVI-
Dot Pitch / Pixel Pitch: 0.294 mm

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Tommy Tilley & Juanita Darby Department Math

College or Unit: Math Campus: Leesville/Fort Polk

Submitted to: _____ Date 08/17/05 Fiscal Year: 2005-2006

1. Describe target audience.

NSU Students located on the Leesville/Ft. Polk Campus.

2. Describe project/initiative for which you are requesting funds.

To upgrade wireless network on the Leesville/Ft. Polk campus.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

**Expansion of available services to students on the Leesville/Ft. Polk campus.
To upgrade the wireless network on the Leesville/Ft. Polk campus to be compatible and equivalent to the main campus wireless network.**

4. Indicate how each project objective will be evaluated.

Student requesting access to the wireless network will be asked to complete a survey regarding their experience with the wireless system. These surveys will be reviewed by the Leesville/Ft. Polk Technology committee to evaluate the effectiveness of this equipment.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

The present wireless network will only accommodate approximately 10 students before the network speed is drastically reduced. It is important to upgrade the access because more and more students are requesting this service.

6. How will funding of the project advance the University and College / unit technology plan?

The objective continues to support the five year technology plan instituted by the University by providing wireless access at the building level on all campuses.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Steven Hoover with Telecommunication

8. Describe any personnel (technical or otherwise) required to support the project/initiative.
none

9. Provide a schedule for implementation and evaluation.

Once approved, equipment will be ordered immediately and normally takes 4-6 weeks for delivery. All services should be available to students for start of Spring Semester.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

Hardware expected life is 5-7 years. Software upgrades are included in the service contract through the same version. A software upgrade to the next version may be necessary in three to four years.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

BUDGET

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Steve Hicks Department Disability Services

College or Unit: University College Campus: NSU - Natchitoches

Submitted to: Jennifer Long Date 08-24-05 Fiscal Year: 2005-2006

1. Describe target audience.

The target student is any deaf student at Northwestern State University. This fall it will be Spencer Frey, an entering first-year student. Frey and others like him are entitled to have equal access to education as per compliance with federal mandates--the American with Disabilities Act of 1990 and the Rehabilitation Act of 1973.

2. Describe project/initiative for which you are requesting funds.

The initiative is to purchase a laptop and computer software called "iCommunicator." This is a software program that efficiently converts the course instructors' speech to (1) text and (2) video sign language, for use in the classroom and later study. It is a patented communication access technology that solves very difficult communication challenges in education, the workplace, and public access venues.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

Objective 1: To accommodate the disability in the most effective way. This way provides autonomy and self-reliance for the student, both inside class and at home.
Objective 2: To negate the need for an interpreter to accompany the student. This is less obtrusive in the classroom setting and less expensive because of multiple uses.
Objective 3: To train affected students and faculty in techniques for using the equipment. This will maximize communication in academic and other settings.

4. Indicate how each project objective will be evaluated.

Objective 1: The student will express satisfaction with the accommodation as measured through a formal consultation with the coordinator of disability services.
Objective 2: The student will rely on the equipment and not need an interpreter, as indicated in formal consultation with the coordinator.
Objective 3: The student will be satisfied with the effectiveness of his communication with faculty and peers, and will demonstrate learning through acceptable class participation and grades.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.
There is a legal justification in that accomadations must be provided for students with disabilities. As an institution of higher education that receives federal funds, Northwestern State University must comply with the ADA of 1990 and section 504 of the Rehabilitation Act of 1973. This technology will serve to be the most reasonable accomodation* for this student, and one requested by the current student to improve his communication access with his faculty, peers, residence hall mates, and others.

6. How will funding of the project advance the University and College / unit technology plan?
It will bring us into full compliance with the needs of this student with a disability.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.
**Steve Hicks, M.A.
Coordinator of Disability Services (January '97 to present)
Experienced with the Dragon Naturally Speaking software product '97 version from another grant written eight years ago.**

8. Describe any personnel (technical or otherwise) required to support the project/initiative.
No additional personnel required.

9. Provide a schedule for implementation and evaluation.
Order the product as early as September 1 or 2, 2005. It should take less than two weeks for delivery. The software will be configured on the DELL lap top. Set-up time should take less than 2 hours as each of Spencer's classroom professors will need to train their voices to the software (about 30 minutes per professor). In the meantime, a level 4 interpreter from Calhoun, LA, (95 miles one way) is driving to NSU-Natchitoches twice a week to accommodate Mr. Frey with his communication. Evaluation will be ongoing with student, Steve Hicks and product vendor.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

The projected life of the hardware and software is 4 years.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

Please see attached.

***Note: The other accommodation option--an interpreter--is limited to the classroom and thus not a round-the-clock accommodation. There are few if any qualified, level 4 or 5 interpreters that are available and willing to work part time in this 120 mile radius of Natchitoches. (See attachment from Deaf Action Center Director Cynthia Pace).**

iCommunicator™ 4.0 Overview

The iCommunicator™ software program Version 4.0

is a leading edge communication access technology. This very powerful tool provides a multisensory, interactive communication solution for persons who are deaf or hard of hearing and other persons who experience unique communication challenges. The iCommunicator promotes independent communication for persons who are deaf or hard of hearing, and is offered as an alternative, rather than a replacement, for sign language interpreters.

Real-time Translation

Speech-to-Text-to-Sign

As the first advanced speech-to-text technology of its kind to enter the marketplace, the iCommunicator allows effective two-way communication to occur in most natural environments. Speakers create a speech/voice profile and then transmit to the end user's computer where the iCommunicator program efficiently converts in real-time:

- > ***Speech To Text***
- > ***Speech To Video Sign Language***
- > ***Speech To Computer Generated Voice***
- > ***Text To Computer-generated Voice Or Video Sign Language***

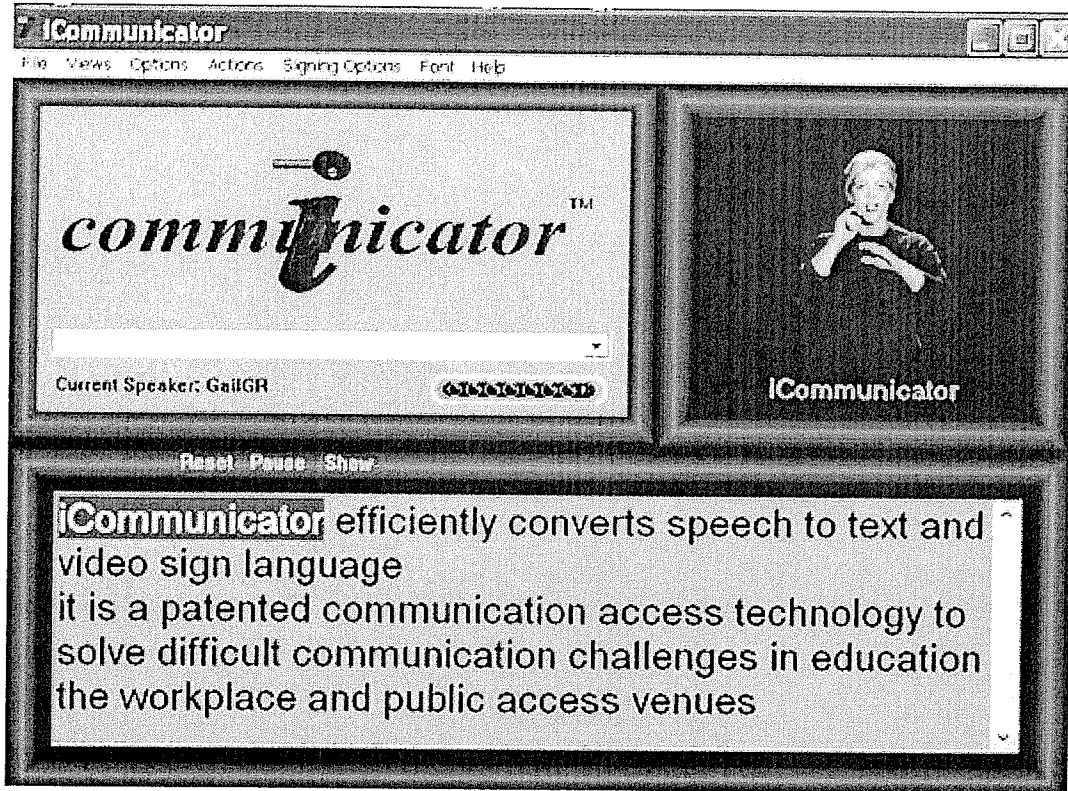

End User Benefits

Unparalleled Opportunities

The iCommunicator's unique technological features provide end users with unparalleled opportunities to achieve efficient, effective communication in most natural environments. A simple point and click of the iText tool allows end users to have email, web pages, and documents created in other applications signed and/or spoken through the iCommunicator program. End users have the opportunity to:

- > ***Achieve Equal Access to Acoustic Information***
- > ***Increase Spoken Language Comprehension***
- > ***Achieve Two-way Communication***
- > ***Improve Reading And Language Skills***
- > ***Increase Independence And Self-confidence***
- > ***Increase Opportunities For Advancement and Success in Education, Employment, Personal Relationships, and Public Access Venues***
- > ***Improve Quality of Life***

The iCommunicator program is being used in K-12 education, post-secondary institutions, government, and public access sites across the United States and Canada.

(image smaller than actual size)

iCommunicator™, V.4.0, Software and Peripheral Kit

Version 4.0 offers an enhanced sign language presentation, the new iText tool, and an upgraded speech/voice recognition engine. Dragon NaturallySpeaking Professional, the underlying speech/voice recognition engine, offers many features to personalize a speaker's speech and voice recognition file and provides the highest speech-to-text translation accuracy in the speech/voice recognition industry. Owners can easily install the software on their own computer using the autoloading installation guide. When used on a notebook computer, iCommunicator becomes a portable, interactive solution to communication accessibility challenges in multiple environments - educational, workplace, and public venues.

The 4.0 software and peripheral kit includes:

- > ***iCommunicator Software Kit V 4.0***
- > ***Dragon NaturallySpeaking Professional***
- > ***iCommunicator User Guide and Training Manual***
- > ***Audio Cables (connector cable, Y-cable)***
- > ***Hardware Security Key***
- > ***Microphone options - wireless or wired***
 - > ***Professional Version - LightSPEED LES 370 wireless RF system with TK-250 noise canceling microphone (LightSPEED system includes 370R receiver, 370T transmitter and TK-250 microphone, BC-4 battery charger & cables, 2 NiMH rechargeable batteries.)***
 - > ***Standard Version - Parrott Bermuda direct-connect microphone***

High Quality Speech Input

The manufacturer has qualified the LightSPEED and Parrott units as the only high quality microphones that are compatible with the iCommunicator software in order to achieve maximum translation accuracy. Prior to shipping, the LightSPEED system is professionally calibrated to optimal settings to support maximum performance and translation accuracy. Peripheral assistive hearing devices such as personal FM systems, hearing aids, and cochlear implant speech processors may be coupled with the computer to take advantage of the iCommunicator's unique features. The LightSPEED LES 370 FM system transmits on the 216 MHz and is compatible with Phonak's Microlink and other FM devices transmitting on that carrier frequency. The LightSPEED FM transmits up to 300 ft., allowing the speaker flexibility when transmitting to the computer.

iCommunicator™ - Program System Features and Benefits

Advanced technology to solve difficult communication challenges in education, the workplace, and public access areas

iCommunicator™ Capabilities and Possibilities

The capabilities of the iCommunicator™ provide end users with a myriad of possibilities to increase independence and achievement, and improve communication and quality of life. Major code changes have been made in Version 4.0 to ensure a reliable and efficient program.

- > Receive equal access to acoustic information.
- > Reduce communication barriers in all natural environments
- > Provide equal access to acoustic information in listening environments.
- > Build self-confidence and increase participation and independence in everyday learning and communication activities.
- > Provide an interactive solution to communication accessibility challenges in educational, workplace, and public venues.
- > Increase achievement and advancement in educational and workplace environments
- > Provide privacy in sensitive communication situations

Efficient Real-time Translation

- > Speech to text
- > Speech to video sign language
- > Speech to computer-generated voice
- > Text to computer-generated voice or video sign language

Special Features for End Users

The iCommunicator™ program's unique technological features provide end users with unparalleled opportunities to achieve efficient, effective communication. The signing engine has been reengineered to provide faster speech-to-text-to-sign conversion. More than 9,200 individual video clips are contained in the iCommunicator™ program's lexicon.

Translation Actions and End User Options

- > Translates spoken language to real time on-screen text
 - adjust the font size for comfortable viewing

- adjust the size of the text window display
- > translates spoken language to video sign language
- > signs on-screen text
 - adjust the signing speed
 - adjust the size of the signing window (custom mode)
 - locate a sign using the word list feature
- > speaks on-screen text using a clear computer-generated voice
 - select the speaking voice (e.g., male or female)
 - adjust the pitch and rate (e.g., speed) of the computer-generated speech
 - deliver written manuscripts and reports using computer-generated speech
 - listen to stories or lectures delivered via computer-generated speech

Other Unique Features and Capabilities

- > save text for later use, editing, or clarification
- > save text for later use, editing, or clarification
- > use the iText tool to have email, web pages, and other documents signed and/or spoken through the iCommunicator program
- > insert notes into real time text for later reference
- > formulate questions and statements for immediate response in class, during meetings, or personal conversations
- > prepare and execute ideas, formulated statements and questions using Quick Say/Edit function keys
- > quickly navigate the keyboard using hotkeys
- > choose a desirable, personalized color scheme
- > select a comfortable mode of computer use -- either standard mode or custom mode *lock* signing (if preferred)
- > protect notes by using Autosave and selecting the time interval
- > eliminate unwanted translations by monitoring the onscreen microphone ON/OFF button

Potential to Improve Speech Recognition and Intelligibility

- > speaks incoming words to enhance speech recognition ability
- > allows for text converted to speech playback at variable rates to improve speech recognition and intelligibility
- > allows coupling of peripheral hearing devices (e.g., hearing aids, FM systems, cochlear implant speech processors) directly to the computer to clearly hear the speaker or the computer generated voice

Opportunity to Enhance Language and Literacy Skills

- > access definitions using the electronic dictionary
- > access the sign for a specific word in the Text Window

- > immediate text display using Show Results Box
- > associate spoken words with displayed text and sign language delivered in English word order

Special Features for Speakers

The iCommunicator's exclusive features provide speakers the opportunity to easily and directly converse with persons with special communication needs.

- > enhanced speech and voice recognition translation accuracy through iCommunicator's expertly integrated system
- > user friendly on-screen prompts and dialogue boxes to assist speakers during speech/voice recognition training
- > speaker verification window to protect the user's speech/voice files
- > opportunity for most speakers to achieve 90% (or better) speech and voice recognition translation in less than 1 hr. of training time
- > fine tuning of speech/voice file through a guided vocabulary building process
- > ability to decrease speech/voice recognition training time by analyzing documents (e.g., electronic versions of texts and manuscripts, scanned materials, summaries, glossaries, and vocabulary lists)
- > fine tune speech/voice file using special features in Dragon NaturallySpeaking, such as the Accuracy Center and the Acoustic Optimizer

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: Michael Rorex Department CAPA
College or Unit: _____ Campus: Natchitoches
Submitted to: Alan Sympet Date 8/20 Fiscal Year: _____

1. Describe target audience.

**All NSU Students located on the Natchitoches Campus.
Specifically the CAPA Department.**

2. Describe project/initiative for which you are requesting funds.

To purchase equipment for CAPA that will provide students with greater practice and learning opportunities. We wish to purchase a total of six new disklavier pianos 4 studio style, 2 grand style. These disklaviers allow students to have an accompanist at their disposal at any given point in time, it will also allow students who are piano majors an opportunity to have a note by note recording of their performances or rehearsals and study them very closely for improvements that need to be made.

Our two music history classrooms, one of which also houses the Fine Arts class which all NSU students are required to take, have very old audio/video equipment that needs to be replaced. Both of these classes listen to a lot of recordings and watch a lot of performances, the equipment now is not of a quality that serves our students well.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

The disklavier project will directly impact students. The disklaviers will be located in practice rooms and measurable improvement will be made in the students who use these machines. Students who practice with these machines will show a greater comfort and knowledge of their accompaniment.

The audio/video project will have an instant impact on the students. It will provide them with better listening and viewing opportunities.

4. Indicate how each project objective will be evaluated.

Practice rooms are regularly monitored and will continue to be, so that we will have a good idea of the number of students using these machines.

The audio/video project will be located within classrooms and will be used for any and all audio/video presentations. No further evaluation will be needed.

Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

The CAPA department is one of the largest on campus. The disklavier project is unique in that it reaches more than one faction of the CAPA department. Both the theater, and music departments will benefit from this greatly. This is around students.

The audio/video project will benefit every student on campus, as all students have to take Fine Arts class.

5. How will funding of the project advance the University and College / unit technology plan?

Objective 1. Improve access to campus resources

Objective 2. Construct multimedia classrooms (including hi-resolution projection systems, SMART boards, etc.) in conjunction with Multimedia laboratories

Increase multimedia equipment availability for student presentations

6. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Once the equipment has been installed the entire CAPA department will be able to utilize the equipment. Dr. Fitenko, Dr. Thompson and Mr. Rorex all have a great deal of knowledge about the equipment being purchased and will be able to see to the success of the project.

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

As with any piano an occasional tuning will be required, the CAPA department already has an individual in charge of this. Other than the occasional maintenance required, the machines will be self supported.

9. Provide a schedule for implementation and evaluation.

Once the equipment has been received in will be installed in the practice rooms that have been designated for student use. The audio and video equipment can also be easily installed and ready for use in these classrooms immediately.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

The discklaviers have a very long life expectancy. The computer system in the computer, under proper care would last ten years or more without needing updating. The only useful upgrade that is going to be possible in the next five years would be a CD reader in addition to the disc reader. The piano's themselves will be usable for twenty plus years. The audio video equipment will bring the rooms up to date, the equipment would be expected to last at least 10 years and no upgrades would be anticipated.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

Subject : Disklavier Bid

Hi Alan -

Thank you for the opportunity to work with the SGA on the purchase of the Yamaha Disklavier Pianos. We were delighted to provide the previous units and continue to service those as necessary.

Here is our offering...

4 - Yamaha DU1A, 48" Professional Upright, Disklavier Pianos, Polished Ebony.

Including: unpacking and full inspection at our facility
proper delivery and set up to the location(s) desired
2 - complete tunings and servicings
10 year Yamaha Warranty
Yamaha ServiceBond
matching bench

unit cost (each) \$9,060.00 Total: \$36,240.00

Again, thank you, and I look forward to working with you.

Sincerely,

Raymond J. Goodrich, II
President

**Mark IV Series Full-Function
Grand Pianos** [Enlarge Picture](#)

Built to Perform

The Ultimate in Personal Music Entertainment

Ever since the original Yamaha Disklavier introduced the marvels of hybrid acoustic/digital pianos back in 1986, these computer-age player pianos have evolved into instruments that can reproduce live acoustic piano concerts and ensemble music with instrumental backings and vocal tracks. The Disklavier Mark IV takes this all a step further. Yamahas unique combination of both acoustic and digital superiority has made it the obvious choice of music-lovers, pianists, and educators worldwide. Its easy-to-operate user functions make the Disklavier a breeze to customize and automate, always giving you the right music at the right time. Combining the tone and touch of world-class Yamaha grand pianos with an astonishing range of interactive capabilities, the Mark IV is the ultimate piano for home entertainment systems, business establishments, or educational and creative environments.

An Easy-to-Use, Yet Advanced Music Entertainment System

Pocket Remote Control (PRC-100)

The sleek, compact design of the PRC-100 literally packs all of the Disklavier Mark IVs features and functions into a single hand-held device. Its intuitive full-color

touch screen (320 x 240 pixels) is as easy to read as it is to use. You can browse your entire library with the handy stylus, or create custom playlists using the built-in QWERTY keypad.

Music So Inspiring You'll Want to Sing Along

Just connect a microphone to the Disklavier Mark IV piano and sing along through its built-in speakers. To fine-tune your experience, the Mark IV offers performance-enhancing vocal effects including room, stage, hall, and reverb. You can choose to display song lyrics externally on any TV monitor or on internally via the Tablet Remote Control. To browse the vast library of song disks available, visit www.yamahamusicsoft.com.

A Built-In Amplified Speaker System Only Possible From Yamaha

The Disklavier Mark IV performs as a stand-alone unit or as part of the ultimate home audio/video system. With genuine Yamaha speakers, each powered monitor is discretely mounted at an outward angle sending music away from the piano for a more spacious overall sound. For larger audio systems and installations, flexible output routings are provided to send music to any part of the house your system allows. Outputs assigned to areas far from the Disklavier can have a digital piano sound inserted into the audio stream, while keeping a background only mix sounding in areas near the acoustic piano.

Low-Profile Hardware Provides the Gateway for All of Your Music Software

Using the Media Center, software can be played directly from the built-in floppy disk and CD drives, and removable USB storage devices*, or loaded to internal memory for easy access. Convenient connections include headphone outputs, microphone input, and USB ports. The retractable glossy, black cover conceals the Media Center and matches the finish of the piano's cabinetry.

* Certain USB storage devices may not function properly with the Disklavier Mark IV Series.

For a list of compatible products, please visit www.yamaha.com/disklavier.

PianoSoft™ Quality Meets Quantity

Performances by world-class artists on PianoSoft™

PianoSoft Solo™ Series

World-class solo pianists perform piano-only music upon your request. Available in many genres, these selections are for the piano purist in all of us. With everything from country to contemporary, and from ragtime to Rachmaninoff, PianoSoft Solo makes the legendary Yamaha acoustic piano the featured soloist.

PianoSoft Plus Audio™ Series

Introduced with the revolutionary Disklavier Mark III, this CD-based software line takes advantage of everything digital audio has to offer. Specially recorded vocal and ensemble parts accompany the Yamaha acoustic piano for the ultimate in realism and accuracy.

PianoSoft Plus™ Series

The Plus adds digital instruments to the solo piano appropriate for the style of music selected. You may hear full orchestras including strings, horns, and percussion, or a Country band, a Rock band, and much more.

Smart PianoSoft™ Series

Cutting-edge PianoSmart technology is at the heart of Smart PianoSoft, the Mark IVs fastest growing line of software. Traditional store-bought audio CDs (that you may very well already own) can accompany the Disklaviers professionally arranged piano performance. Recordings dont get any more authentic than the original artists, and thats exactly what Smart PianoSoft delivers... by the hundreds.

Built-In PianoSoft Sampler The Disklavier Mark IV is Ready to Play

Every Mark IV Disklavier comes pre-installed with hours of music right from the factory featuring selections from PianoSoft Solo, PianoSoft Plus, and even PianoSoft Plus Audio! This means that the moment your Mark IV is delivered and powered-up, youll be listening to music right away.

You can purchase and, in many cases, download titles from the PianoSoft catalog, or view the entire catalog at www.yamahamusicsoft.com.

Practice Makes Perfect

More Than a Piano the Yamaha XG Tone Generator

Many educational software titles are available with ensemble backgrounds to accompany practice. The Yamaha XG tone generator has hundreds of high-quality instrumental voices to get the most out of your accompaniment.

The New AEM Tone Generator

Taking digital instruments to new levels of realism, the new AEM (Articulation Element Modeling) tone generator breathes new life into orchestrated backgrounds. This next-generation sound source produces the subtle nuances heard in brass, saxophone, and string sections. Regular software, including educational and even karaoke titles, will spring to life with Yamahas latest sound technology.

Practice One Hand While the Disklavier Plays the Other

Every teacher knows that practicing hands separately improves speed, accuracy, and memorization. With the ability to play the right and left hands independent of one another on selected software titles, as well as vary the tempo, practicing piano on the Disklavier has become a truly interactive experience. Add to this the fact that many popular method and lesson books are being offered with hands-separate recordings on disk, and youve got the ultimate music practice partner.

Digital Quiet Mode/Headphone Mode Flexibility

Yamaha Sound Muting System allows you to instantly switch off the sound of the acoustic piano, enabling the digital piano to be played at ultra-quiet volumes. With this feature, you can play and listen in Quiet Mode with the built-in speakers or in Headphone Mode via the privacy of dual headphones. Enjoy the Disklavier anytime at a sound level best suited for you and those around you.

The Ideal Synergy of Audio, Video, and One Beautiful Acoustic Piano PianoSmart™

PianoSmart Audio Synchronization

You wont need to look too hard to find audio CDs that are compatible with your Mark IV Disklavier you probably already own them. Thanks to PianoSmart, any one of hundreds of standard store-bought audio CDs are ready to play along with the Mark IV. All thats required is the corresponding Smart PianoSoft title for the CD of your choice. So choose a CD of a world-class Yamaha artist playing the piano and watch the Mark IV match the piano recording with the CD. After you load titles into the Mark IVs internal memory, PianoSmart automatically and seamlessly

synchronizes your audio each time.

PianoSmart Video Synchronization

Yamaha didn't stop at just playing audio CDs along with your Disklavier. PianoSmart also provides you with the ability to synchronize videotaped performances with the Mark IV. By simply connecting the audio jacks of a standard video camcorder to the SYNC jacks of the I/O Center, your performance can be immortalized for playback on the Mark IV and a standard TV monitor at the same time!

Classic Form Contemporary Function

SmartKey Now Anyone Can Play Right Away

Have you ever dreamed of playing the piano but thought you didn't have time to learn? With SmartKey technology, the new Disklaviers can make your dream come true. Even if you've never touched a keyboard or read a note of music in your life, the new SmartKey feature makes it easy to learn without a single lesson. Just follow along as SmartKey shows you which notes to play by partially depressing the next key in the melody. SmartKey prompts the Disklavier to wait for you and play at a speed within your comfort zone. Within minutes, you'll be playing entire songs while the Disklavier follows your lead with virtuoso harmonies and arpeggios.

CueTIME, another exciting development in music software, offers sophisticated auto-accompaniment where you don't play along with recordings the recordings play along with you! Simply play the printed piano part and the digital orchestra follows your cue, matching your pace and enhancing your performance with professional arrangements.

*Note: SmartKey software may not be available in some countries.

The International Piano-e-Competition Truly the First of its Kind

Imagine a top-level classical piano competition where the performers, the judges, the audience, the pianos played, and the pianos heard are all in different cities at separate corners of the globe. This happens every other year at the International Piano-e-Competition, and it wouldn't be possible without the technology found only on Yamaha Disklavier pianos. This unprecedented event, first held in June 2002, uses state-of-the-art technology to expand the arena of virtuoso competition.

Contestants gather in selected cities to perform on Yamaha CFIIIS concert grands equipped as Disklavier Pros. Performance data is then transmitted over the Internet, allowing judges and audiences to listen on actual acoustic pianos on stage not through audio recordings subject to the quality of speakers and microphones. This method is so ground-breaking that it has been noted by Gustav Alink, who rated the International Piano-e-Competition among the top 30 in the world (from over 400) in his book *Piano Competitions Worldwide*. Disklavier owners around the world watched the competitions Web site (www.ecompetition.org) waiting for the latest performances to be posted. Once pieces were downloaded, enthusiasts enjoyed world-class musicians giving private performances on a live acoustic piano all in the comfort of their own homes.

Unparalleled Experience Means Unrivaled Recording and Playback

There's a reason why the Yamaha Disklavier has become the symbol of excellence in reproducing pianos. Disklavier technology is factory-built into the piano from the beginning of its construction.

Superior Yamaha development and design

The Disklavier Mark IV's advanced intricate internal construction:

1. Power supply unit
2. I/O center
3. Powered speaker
4. Powered speaker
5. Solenoid unit
6. Media center
7. Sensor

Ultra-Large Internal Music Storage Capacity

Floppy disks, CDs, and other removable media are fine for carrying music from one place to another. But once the music makes it to the Disklavier Mark IV, it can be loaded onto the vast internal memory capable of holding hundreds of hours of music. Virtually every MIDI song file ever created for the Disklavier could be loaded and stored inside the Mark IV. If that seems a little excessive, the extra storage comes in handy for loading CD audio tracks.

Yamahas Exclusive High-Performance Grayscale Hammer Sensor

The world's first continual-detection optical hammer sensor continuously traces the hammer position from the time a key is pressed until it's released. This outperforms the previous two-point detection sensors of earlier Disklaviers and the simpler "Key ON/OFF" sensors used on many other systems. With the grayscale key sensor, the Mark IV monitors every motion of the key and hammer - even rapidly repeated notes - with meticulous precision and the softest touch.

Servo Control for Precision Playback Performance

Under the command of specially developed LSI microprocessors, the servo control system continuously monitors the movement of each key, precisely recreating every detail of the original performance. This allows for a slow return of the keys and delicate pianissimo, things that were previously unattainable.

Get Connected with the I/O Center

The Disklavier Mark IV has the ability to connect to a wide range of external equipment. Essentially, any device that connects to the Mark IV will be plugged into this "Input/Output" center. You can connect TVs, cameras, computers, home networks, and various other audio and music equipment to the I/O Center. No matter what your particular needs are, the Mark IV is ready to play.....

Specifications:

DC2M4		
Sensor System	Key Sensors	Non-contact optical fiber/grayscale shutter sensing system for 88 keys (senses the key position, keying velocity, and key releasing velocity)
	Hammer Sensors	Non-contact optical fiber/grayscale shutter sensing system*
	Pedal Sensors	Non-contact digital optical sensing system (senses the pedal position)** *Except for DGC1M4, DC1M4, DC2M4 **Continuous sensing for the damper and soft pedals, and on/off sensing for the sostenuto pedal.
Drive System	Keys	DSP servo drive system (high-power

		servo controlled solenoids)
	Pedals	DSP servo drive system (servo controlled solenoids)

	Polyphony	32-note max.
	Ensemble Parts	16
	Voice Module Modes	XG, GM
	Normal Voices	676
	Drum Voices	21 kits total
Power Source	Local AC current, 100~240V, 50/60Hz	
Supplied Accessories	Media Center, installation kit for the Media Center, monitor speaker, installation kit for the monitor speaker, speaker cord, PRC100 Pocket Remote Control, CF wireless LAN card, EA-BL08 rechargeable battery, cradle, EA-70 AC adapter, AC power cord, advanced operating manual, Quick Guide, stereo headphones	
Optional Accessories	HPE-170 headphones	
Length	5' 8" (186 cm)	
Width	58-3/4" (149 cm)	
Height	39-3/4" (101 cm)	
Weight	752 lbs. (341 kg.)* *Weight includes control unit and speakers	
Finish	All models available in polished ebony finish. Please contact your dealer for other available finishes.	

YAMAHA CORPORATION OF AMERICA

DU1A

**48" Mark III Series Upright
Disklavier**

Outstanding pianos and sophisticated musical entertainment systems in one!

The new Disklavier Mark III upright offers an unprecedented range of playback, recording and other features in the classic, space-efficient and budget-friendly vertical form of the perennially popular Yamaha U1 piano.

The original Yamaha Disklavier, which made its debut back in 1986, introduced the world to the wonder of traditional pianos equipped with integrated digital electronics for recording, auto playback and more. Since that time, these computer-age 'player' pianos have evolved into instruments of truly remarkable capabilities. They can reproduce not only 'live' acoustic piano concerts, but ensemble music with instrumental and vocal tracks as well. They allow you to record and play back your own performance, create complex multi-track arrangements, and connect to the world of musical opportunities offered by MIDI devices, personal computers and the Internet. Their unique combination of acoustic excellence and digital versatility has made them an increasingly popular choice of pianists, educators and music-lovers worldwide.

Today, Yamaha is proud to introduce the latest evolution of the Disklavier line, integrating a host of new acoustic advances and cutting-edge digital developments. Most models now play audio/MIDI CDs as well as floppy disks. Revolutionary new PianoSmart™ features make it possible to synchronize piano recording and playback with standard audio CDs. And for those who always wanted to play the piano, new SmartKey™ technology makes it easy, guiding you through songs note by note, while adding professional embellishment.

*Some features not applicable to certain models.

Disklavier™ Mark III Series Uprights

- Recording and auto-playback functions
- New compact control unit with CD and floppy drives
- New PianoSmart™ audio/video synchronization
- Built-in *Silent System*
- Built-in SmartKey™ play-assist system

- Abundant memory and programming features
- Interference-free optical key, hammer and pedal sensors
- XG instrumental tone generator
- Direct computer interface
- MIDI and AUX connections
- Yamaha acoustic piano quality and performance

Expanded recording and playback functions

Newly equipped with a CD drive, the DU1A now offers the full functionality of a Disklavier Mark III grand in a popular upright model, allowing you to enjoy the entire range of Yamaha and third-party software, including CD software complete with high-fidelity vocal and instrumental audio tracks. It also features PianoSmart™, a new technology that lets you record your own piano or MIDI instrumental tracks while listening to your favorite audio CDs, and then play them back in perfect harmony. PianoSmart™ even allows you to synchronize recording and playback with video cameras and multi-track audio recording equipment.

Newly designed control unit

Equipped with 16 MB of internal memory, the Disklavier control unit lets you store your favorite songs for easy-access pre-programmed entertainment. An integrated digital tone generator can recreate nearly 700 instrumental tones, through headphones or external speakers, for piano/MIDI ensemble performance. PC, MIDI and AUX connections offer easy access to a world of external enhancements, from audio equipment and MIDI devices to personal computers and the Internet.

Supported by a vast library of Yamaha PianoSoft™ software, the Disklavier can reproduce live concerts by many of the world's top pianists, complete with the lifelike key and pedal movement.

It's like having world-class artists performing just for you.

It can also deliver high-fidelity vocal and instrumental tracks, so you can enjoy jazz combos, popular groups, chamber ensembles and more.

New teaching technology now even allows you to synchronize recording and playback with your own standard audio CDs or video camera.

Yamaha PianoSoft™ software

The original Disklavier music software, Yamaha PianoSoft offers prerecorded piano concerts by many of the greatest pianists of our times, along with many more performances by top studio pianists. The PianoSoft library includes literally hundreds of titles in genres from classical to jazz, pop and country music, along with special seasonal collections, regional anthologies, children's songs, and compilations made especially for instrumental or vocal accompaniment. Whatever your taste in music, PianoSoft can bring it to you at the touch of a button, with 'live' piano music in the comfort of your own home!

PianoSoft-Plus™ ensemble software

The 'Plus' in Yamaha PianoSoft-Plus software is the addition of digital instrumental ensemble tracks, made possible by the Disklavier's internal XG MIDI tone generator. With these disks, you can enjoy Disklavier acoustic piano performance augmented by the sound of strings, brass, woodwind, percussion and more. Sit back to the beautiful sounds of chamber music, the passion and drive of a jazz quartet, the upbeat tempos of a popular group, or a stirring orchestral arrangement. It's all right there, with the ease of a single diskette. Just slip it into your Disklavier, press PLAY and enjoy your command performance.

PianoSoft-PlusAudio™ ensemble software

The Mark III Series' CD-playing capabilities expand your musical entertainment options even further. PianoSoft-PlusAudio and other audio/MIDI CD software complements Disklavier performance with high-fidelity vocal and instrumental audio track. Experience the sound of your favorite groups — complete with vocalists and instrumental soloists — enhanced by the live-concert presence of Disklavier acoustic piano playback. With a variety of titles already available*, and more in development, your Disklavier can entertain you and your guests better than ever — all with the ease and convenience of conventional audio CDs.

*Availability may be limited in some countries.

NEW! PianoSmart technology opens up a whole new world of entertainment possibilities

PianoSmart™

A truly revolutionary breakthrough in Disklavier technology, the PianoSmart system opens up a world of additional ways to enjoy your digital/acoustic piano. PianoSmart intelligently synchronizes Disklavier recording and playback with the operation of the built-in CD player. What this means in real terms is that you can now record your own piano or electronic instrumental tracks while listening to your favorite CDs, and play them back in perfect combination with the original recordings. 'Sit in' with the hottest new groups, classic combos or a full symphony orchestra, then sit back, press a couple of buttons, and listen to yourself performing 'live' with the pros!

Through the use of MTC (MIDI Time Code), PianoSmart can also synchronize recording and playback with external devices such as multi-track recording equipment and video cameras*. These features enable pianists, families and educators to create audiovisual records of any performance, complete with 'live' Disklavier acoustic piano playback, stereo audio instrumentals and vocals, and full-motion video — all as one integrated presentation. They also allow creative musicians to collaborate in ways seldom dreamed of before. In combination with the many other Disklavier capabilities, PianoSmart extends digital/acoustic creativity into a whole new universe of options.

*Video synchronization requires an external video MIDI sync interface.

New! Speaker connections

The DU1A now comes equipped with speaker jacks. Just plug in your own powered speakers to enjoy piano/ensemble performance or play the piano at reduced volume in digital Quite mode.

PC, MIDI and AUX connections

Along with an unprecedented range of internal capabilities, Disklavier pianos also provide easy plug-and-play access to a world of external equipment. MIDI IN/Out jacks let you control devices like synthesizers and sequencers from the Disklavier piano keyboard, add the capabilities of other MIDI devices to your Disklavier

ensemble, or play the Disklavier's piano and instrumental tones from external equipment.

AUX connections let you amplify the Disklavier's sound via external audio equipment. The AUX In jack also allows you to listen and play along with audio recordings through external speakers or headphones.

The built-in PC interface lets you connect the Disklavier directly to your personal computer, for virtually unlimited range of additional possibilities. Play the Disklavier from your PC keyboard or applications. Download music files for playback on your Disklavier. Or even transmit Disklavier performances across the Internet.

Silent System versatility

The built-in *Silent System* lets you cancel the acoustic sound and play at reduced volume through external speakers or headphones. This capability makes the Disklavier great for use as a MIDI controller and for multi-track recording, too.

Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana

Prepared by: James Brooks, MSN, Tamara Baxter, RN, Trey Glass
Department: Nursing
College or Unit: Nursing Campus: Shreveport

Submitted to: _____ Date _____ Fiscal Year: _____

1. Describe target audience.

The target audience will be the students and staff at the Nursing Education Center on the Shreveport Campus.

2. Describe project/initiative for which you are requesting funds.

The funds will allow for the purchase of 2 ceiling or wall mounted automated projection screens, 2 ceiling mounted projectors and 2 permanent PCs for the Nursing Education Center Skills Laboratory. The quantity of equipment needed is two, due to the fact that the Nursing Skills Laboratory is divided into two learning environments. This project will allow for conservation of room space in the skills laboratory and ease of visualization during audio/visual demonstrations in the skills laboratory. (See Attached *Dell E-quote for single set of equipment*)

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

The Nursing Education Center students at Shreveport will:

- A. Understand demonstrated nursing skills (via A/V material).
- B. Utilize materials purchased by the university (i.e. CD-ROM programs) to assist in teaching and learning of various nursing skills.

4. Indicate how each project objective will be evaluated.

Each objective will be evaluated by students during annual Shreveport Student Government Opinion Survey.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

Money is not available at this time from the current budget to fund this project.

There are approximately 3,000 Associate Degree in Nursing, Bachelor of Science in Nursing, Master of Science in Nursing, and Radiology Technology Student enrolled for Spring, Summer and Fall semesters at the Shreveport Campus.

In addition, the Nursing Education Center houses the Northwestern State University Child and Family Network. There are 310 students enrolled each year for credentialing. These students attend twice a week. Weekend Sessions are held for Training of Child Care Workers for approximately 1,800 students each year.

6. How will funding of the project advance the University and College / unit technology plan?

Purchasing these systems will provide additional learning opportunities and avenues for students. The skills laboratory will have a better learning environment. This will improve student learning experience as the student will feel more comfortable in the learning environment thus meeting the purpose of the technology fee program.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

James Brooks, 2nd level ASN Coordinator, Tamara Baxter, RN, Nursing Skills Laboratory Coordinator, Charles Cameron, Media Services, Trey Glass, IT department, and Tom Breaux, Plant Operations

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

9. Provide a schedule for implementation and evaluation.

Once the audio/visual equipment is received at the Nursing Education Center, they will be implemented and maintained by the Media Services and IT Departments at the College of Nursing. Evaluation will be provided by the SSGA Survey at the beginning of each Spring Semester and Nursing Skills Laboratory Course Evaluations.

Any reports generated by this system will be available

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

When properly maintained and used, the A/V equipment should have a useful life of 7 -10 years. There should not be any anticipated equipment upgrades during the next five years with this request unless additional facilities are secured. The College of Nursing has already purchased the needed software to be utilized in the Nursing Skills Laboratory.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment.

**Student Technology Fee
Special Initiative Funding Request Form
Northwestern State University of Louisiana**

Prepared by: Bette Howell Department FACS

College or Unit: Science & Technology Campus: Natchitoches

Submitted to: _____ Date August 23, 2005 Fiscal Year:

1. Describe target audience.

NSU Students located on the Natchitoches Campus.

2. Describe project/initiative for which you are requesting funds

Funds are requested to upgrade two lecture classrooms in the FACS Building to fully equipped multimedia presentation rooms.

At present, rooms are equipped with stationary pull-down screens and portable carts that must be rolled in and setup prior to each class meeting. Student desks are rearranged and cords are stretched across the floor to accommodate these carts.

One classroom is a 70 seat lecture room; the other a 45 seat one.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

4. Indicate how each project objective will be evaluated.

Continued use and scheduling of classes in these multimedia rooms will provide students with the most up-to-date information in the most accessible form.

Student presentations will be enhanced with the use of this equipment to better prepare them for the corporate world or advanced educations.

Down time needed to set up and/store portable equipment will be eliminated provided students with the best possible quality education during the time allotted for each course.

Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

This will provide 2 complete multimedia classrooms for the FACS Building.

Approximately 300 FACS/HMT/ECED majors will make use of these classrooms each semester with another 250 non-majors enrolled in the University Core Nutrition classes also taught in this building. In addition, classes from other disciplines, including student support services often meet in our building. There is no regular schedule of these but is based on university needs per semester.

5. How will funding of the project advance the University and College / unit technology plan?

Access to and use of the most up-to-date equipment by both faculty and students will enhance the education of all students.

6. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Dr. Patricia Pierson, Head of the Department and Mrs. Bette Howell, Assistant Professor are both accomplished in the use of multimedia presentation equipment and will be responsible for educating the FACS faculty in the proper use of the media stations. Each faculty will then assist students in the proper use on a per need basis.

A Faculty In-Service will be conducted upon installation of the equipment for this purpose.

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

It will be necessary for the vendor to provide installation of the equipment purchased.

Existing faculty members will support use of the equipment by their continued use of it in classes for both student and faculty presentations.

9. Provide a schedule for implementation and evaluation.

Equipment should be delivered and installed at the earliest possible time once funding is secured. Implementation will be immediate upon installation

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

The basic hardware as outlined in the quote from Creative Presentations should not become outdated. Life expectancy cannot be estimated at this time either. The department has equipment anywhere from one to more than ten years old that is still functioning.

Computer towers should also last for at least five years. However, upgrading of computers is on ongoing process at the university and is done whenever funding is available on a per need basis.

11. Attach a detailed budget, including: description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

See Attached Quote from Creative Presentations times 2

Help

For shipments of certain products to California, state environmental fee of up to \$10 per item will be added at order invoice. For shipments of certain items to Alberta, Canada, a provincial environmental fee will be applied to your invoice. Pricing, specifications, availability, and terms of offers may change without notice and DO NOT INCLUDE APPLICABLE SHIPPING AND/OR HANDLING CHARGES OR TAXES. Please note that Dell cannot be responsible for typographical or other errors, and reserves the right to modify or cancel any orders resulting from such errors. Refer to your invoice for final information regarding order detail, including tax & shipping amounts. Offers not necessarily combinable. Prices have been rounded to the nearest dollar for online display. All sales are subject to Dell's Terms and Conditions of Sale located at www.dell.com unless you have a separate written agreement with Dell.

Picture is for illustrative purposes only. Price may increase or decrease depending on options selected.

Please note that this Microsoft software product may use technological measures for copy protection. In such event, you will not be able to use the product if you do not comply with the product activation or reactivation procedures, which may be completed by Internet or telephone (toll charges may apply).
