STUDENT TECHNOLOGY FEE
Funding Request Form
Surplus Funds for Fiscal Year 2006-07
Northwestern State University of Louisiana

Prepared by: __Dr. Karen McFerrin____   For: _____

College: ___Education_____ Campus: __Natchitoches_____   Department:_____

Where will requested equipment be located/installed/housed: Bldg. _TEC_   Room: _C114_

Are property policies/procedures in place by the department for equipment requested?   _YES_

Delivery to the Student Technology office located in Watson Library, Room 113. Date_____

1.   Describe target audience.

The target audience for this proposal includes all undergraduate and graduate students attending classes in the Teacher Education Center on the main campus of Northwestern State University, including education majors, General College students taking education and educational technology courses, and other University students taking education and educational technology elective courses.

2.   Describe project/initiative for which you are requesting funds.

This initiative will provide for an upgrade of hardware, software, peripherals, and work station in the Student Multimedia Classroom and Lab in C114 of the Teacher Education Center building. This replacement grant will be for hardware, software, peripherals, and work station only; the existing wiring for networking will need no modifications.

3.   State measurable objectives that will be used to determine the impact/effectiveness of the project.

To provide all education students with newer, more advanced hardware, software, and peripherals, and to meet efolio requirements for graduation as evidenced by:

a. A log of students using multimedia equipment lab and the multimedia classroom.
b. Records of training conducted on this equipment each semester.
c. Archived multimedia folio products produced as course performance based assignments in each students PassPort account as well as shared in-class accounts.
e. Individual student final exit folios that contain selected folio items and which become parts of their permanent academic record.

4.   Indicate how each project objective will be evaluated.

Evaluation on the effectiveness of the initiative in terms of advancing the teaching/learning process can be obtained through observation and counting classroom usage and sign in sheets when functioning as an open lab. Additionally, feedback will be obtained from efolio posting to PassPort class areas. Also, principals and supervising teachers will provide information on the actual integration of technology into the teaching/learning process by the students and from individual faculty members who are teaching the classes that use the equipment in the Student Multimedia Lab in C114.

5.   Provide a justification for funding of the project. Estimate the number of students who will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

Due to the unique nature of education and educational technology courses and the computer use requirements of the College of Education, students must have access to an up-to-date technology lab in order to complete their course assignments. Currently 10 classes are held in C114 weekly consisting of a total of approximately 250 students, as well as other classes that sign up for use on an as needed basis. When class are not being held, C114 becomes an overflow computer lab open for all students to access the Internet and Blackboard and to complete technology assignments.

The NSU College of Education provides programs to approximately 1,500 students per semester (per year student numbers are around 4,000). Each of these students has the need to gain technological skills taught in their educational technology courses.

The equipment available is out of date, totally inadequate, and incapable of running the newer, more current software that is needed and received within the College. Educational publishers provide preview/ demonstration copies of their software. At the present time, our equipment in C114 does not have sufficient multimedia capabilities to display and run the new software that we receive. The proposed upgrade would make the machines in C114 compatible with all MS licensed software.

The College of Education recognizes that technology is an integral portion of the educational community. We believe our students have a unique need in that they must be able to seamlessly integrate technology into their everyday existence in order to effectively use it as a tool for enhancing the teaching/learning process. Our graduates must become skilled users of current technology and must be prepared to acknowledge and master the technology they will encounter after graduation.

6. **If funded, which NSTEP (http://www.nsula.edu/nstep/NSTEP.pdf) objective will this funding of this project advance? How will funding of the project advance the University and College/unit technology plan?**

NSTEP Objective #5 says to develop and implement a system of resource commitment and allocation in order to increase excellence in academic and professional programs.
Funding of this project would provide technology for direct use by completing coursework activities within the Teacher Education Center and would provide classrooms with updated technology and multimedia. Objective #1 says to attain accreditation for each eligible degree program by a Board of Regents approved national accrediting agency. In the case of the College of Education, this initiative allows for continuance of reaccreditation by the National Council for Accreditation of Teacher Education (NCATE). Overall, this project allows for an extension of classroom technology availability and state of the art multimedia capabilities to be available within the Multimedia Lab of the Teacher Education Center at a very reasonable per student cost.

A major goal listed in the College of Education's Technology Plan is to promote the use of technology to augment instruction, strengthen communications, and improve services. Another is to develop innovative, nontraditional methods of instruction. Our faculty is doing this, but our students need better technology equipment in the Multimedia Lab to fulfill the requirements of their courses. The funding of this initiative will move us closer to the attainment of these goals. It will provide students with technology resources and training that will assist them in using technology tools in their future or current teaching situations. It will provide students with technology resources and training that will assist in developing and applying their technology skills to enhance the teaching/learning process. Upgraded technology hardware in the C114 Multimedia Lab will allow for more efficient use of the technology equipment in the two methods classrooms.

7. **List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.**

Karen McFerrin, Ed.D.
Associate Professor
College of Education/Educational Technology
Dr. McFerrin has extensive experience with on-line education and evaluation and is currently teaching and working in the areas of technology integration, use and evaluation of software in the teaching/learning process, and support of the new curriculum standards.
She has made numerous professional presentations concerning the integration of technology, technology planning, and communication through distance education media. She is involved at local, University, and state levels in refining and implementing technology standards for teaching and for teacher education with regards to ISTE and Louisiana In-Tech initiatives.

Dr. Ron McBride, Ph.D.
Professor
College of Education/Educational Technology

Dr. Kioh Kim, Ph.D.
Assistant Professor
College of Education/Educational Technology

Dr. Sanghoon Park, Ph.D.
Assistant Professor
College of Education/Educational Technology

All members of the initiative team are currently active in the use of instructional technology. Each has been active in the design and delivery of successful college courses that use technology to further advance the teaching/learning process.

8.   Describe any personnel (technical or otherwise) required to support the project/ initiative.

The Educational Technology faculty and graduate assistants in the College of Education can provide any needed additional technical support for the initiative.

9.   Provide a schedule for implementation and evaluation.

Implementation:

May, 2007	Order equipment Receive equipment
June, 2007	Develop program for implementation and equipment use Begin use of new hardware/software in C114
August, 2007	Receive feedback on C114 equipment use
December, 2007	Final semester evaluation of student use of equipment

Throughout the summer and fall 2007 semesters:
Demonstrate and explain use of equipment and new software during regularly
    scheduled faculty meetings.
Demonstrate and explain use of equipment and new software during regularly
    scheduled class meetings held in the multimedia classroom.

Evaluation:

Feedback will be obtained verbally and written from faculty/students on training.
Sign up sheets and class rosters in the Multimedia Lab in C114 will monitor equipment use.
Survey of faculty/selected students will be conducted to assess use and additional
training requirements needed.

10. **Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.**

This initiative would replace the existing and inadequate computers, software and peripherals in C114 with new systems with a 4-year life expectancy, dependant upon the rate and nature of industry standard changes.

11. **Explain in detail a plan and policy that will be in place to ensure property security/controls for any equipment received through a Student Tech fee grant.**

TEC Room C114 is secured an electronically locked door with access by key which is given only a few faculty and staff members. The outside door is always locked from the outside. Students are only allowed access to the room when a faculty member is in attendance. Equipment within this room is monitored continuously by ETEC faculty and by College of Education faculty who teach in this room.

12. **Attach a detailed budget, including:**
    a. **Specs, description, cost, state contract number, vendor for each item**
       (Under construction)

TOTAL COST:

Cost-effectiveness:
[Student impact per dollar spent per year]

$ 130,910.63

for 2000 students over 4 years = per student per year   Classroom $8500.00

b. Cost of Outside Support Personnel: none $ 139,410.63

c. Description of how the proposal will support University/College/unit resources (i.e. cash match, funds from other sources, or reallocation of existing hardware/software or other equipment).

The proposal will allow student access to a Student Multimedia Classroom and Lab with an adequate hardware, software, and peripheral configuration to meet their needs, will enable the College of Education to use software resources it receives from grants and partnerships and will allow for connectivity and application hands-on experience for a large number of pre-service and in-service students within the College of Education.

13. Attach a letter of support for the project signed by the requesting unit's Dean.

Attached is letter of support for the project signed by Dean Vickie Gentry, College of Education.

* The estimated lease cost is the monthly payment amount for a lease commencing on or before 6/2/2007 with a term of 36 months and a fair market value purchase option at the end of the lease term. This and other leasing and financing options are available through Hewlett-Packard Financial Service Company (HPFSC) or one of its affiliates to qualified education and state and local customers in the U.S. and subject to credit approval and execution of standard HPFSC documentation. Fees and other restrictions may apply. This is not a commitment to lease. Rates and payments are subject to change at any time without notice. Leasing and financing options for Federal governmental agencies (subject to a $50,000 minimum) are available from Hewlett-Packard Company. For more information, call Hewlett-Packard Financial Services Company at 1-888-277-5942 and talk to a financial services representative who specializes in supporting government and education entities.

* HP is not liable for pricing errors. If you place an order for a product that was incorrectly priced, we will cancel your order and credit you for any charges. In the event that we inadvertently ship an order based on a pricing error, we will issue a revised invoice to you for the correct price and contact you to obtain your authorization for the additional charge, or assist you with return of the product. If the pricing error results in an overcharge to you, HP will credit your account for the amount overcharged.

Description   Product Details

Studio 8 is the essential software suite used to design, develop and maintain interactive online experiences. Combining the latest releases of Dreamweaver, Flash Professional, Fireworks, Contribute and FlashPaper, Studio 8 offers web designers and developers a new level of expressiveness, efficiency and simplified workflow to create websites, interactive experiences and mobile content. Studio 8 is the must-have suite for anyone creating websites, web applications, interactive presentations, or mobile content. Use Flash Professional to author rich interactive content. Fireworks provides optimization tools to balance quality images with compression. Dreamweaver delivers clean, standards-based applications. Contribute makes managing web content a shared team task, and FlashPaper's one-click process converts any document into PDF and FlashPaper files for the web. Studio 8 speeds the design, development and maintenance process, with round-tripping between Macromedia products, integration with 3rd party applications and features like batch rendering, batch encoding and general performance enhancements to let you get it done, faster. Studio 8 offers the broadest range of creative tools to let you express yourself as you create interactive media, websites or applications. Use advanced graphics, text, animation, video and audio tools with precision control and quality. From simple animated graphics to sophisticated interactive experiences, Studio 8 gives you a full suite of tools for limitless creative expression. With Studio's support for Windows and Mac OS X, you can work on the platform of choice - and deliver content for the platform of choice. Deliver projects that support the widest range of browsers and server technologies, and leverage Flash Player, installed on over 98% of connected computers. Take your experience farther, and use Studio's tools to create content for millions of mobile handheld devices and phones.
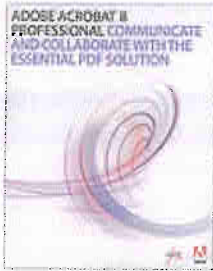

Acrobat 8 Professional
Model: 2206069

With **Acrobat 8 Professional**, you have the freedom and ability to create secure PDF documents with just one touch of a button. Whether you are working in Excel, Word, Access or any of a variety of programs, this multifaceted software allows you to assemble various files from multiple applications into a single document. Not only can you merge documents, drawings and rich media content seamlessly, **Acrobat 8 Professional** lets you optimize file size and arrange any files in any order regardless of file type, dimensions or orientation. Password protection and 128-bit encryption help maintain the integrity of your document for tamper-proof results.

Use the built-in review capabilities to circulate documents and track feedback for simple project management. OCR technology enables you to create compact, searchable Adobe PDF documents. Now, you can convert Microsoft Outlook e-mail archives to Adobe PDF to simplify searches and retrieval. **Adobe Professional 8** also includes the LiveCycle Designer software, which gives you the ability to design interactive forms that can be used via e-mail or the Web to collect data. Produce professional, print-ready files thanks to the automated preflight process. It corrects issues that might compromise the quality of your documents prior to sending them to colleagues or clients, without creating an entirely new document.

Compare with products in this price range.

Product Specs

Product Features

- Compile comments and feedback in one single document and track responses for easier management of the entire review process

- Enable any user with Adobe Reader to take part in document reviews, electronically sign PDFs or fill out and save PDF forms

- Convert your paper documents and e-mails into easily searchable PDFs for simple archiving

- Create PDF documents with automated manual entry right within your Microsoft Office applications, including Outlook, Internet Explorer, Project, Visio and more

- Review and markup PDF files with familiar commenting tools, including sticky notes, stamps, highlighter, pencil, strikethrough, callout, dimension lines, shapes and clouds

- Merge feedback into a single PDF file to reconcile comments

- Remove metadata, hidden layers and other private information using the built-in redaction tools

- Optimize your documents and eliminate

- problems that might diminish print quality

- Protect PDF documents with passwords and 128-bit encryption to evade computer thieves

- Digitally sign and certify documents to validate that they came from a trusted source

- Establish and reuse document control policies to precisely manage who can print, save, copy and modify documents

- Embed multimedia, 3D designs, audio and video capabilities for a richer experience

Synopsis   System Requirements

Overview

What better way to share life's special moments than with this fusion of customizable photo and video editing software? **Photoshop Elements** partners power and simplicity, enabling you to stage your photos in the best light possible, while **Premier Elements** helps you create and share impressive home movies easily. Both programs feature a host of grade-A editing tools and eye-popping effects that will wow onlookers during each viewing. The options are endless and the images are everlasting.

Upgrade your photos with **Photoshop Elements**. Start customizing your photo creations by choosing flexible themed layout patterns to fit any format, from albums and postcards to scrapbook pages and DVD covers. Instantly erase common blemishes, brighten colors, and create flawless composites with professional-grade results. Take advantage of Flash technology to animate your images, and share them with family and friends in memorable Web galleries. Stumped for gift ideas? Make keepsakes, including custom slide shows, cards, albums pages, photo books, prints, flipbooks, and your loved ones are sure to be overjoyed by the gesture. With **Premier Elements**, burn your video footage to DVD in two simple steps, complete with a DVD menu and scene index, or easily assemble your movie in Sceneline by rearranging clips with drop-and-drag simplicity. Now, you can edit and preview your movies in one convenient place. The Monitor Window lets you split and trim video clips, add dazzling effects and more. When your movie is ready, proudly share it with family and friends. Like your memories, this complete photo and video editing system is priceless.

Features

- Begin customizing your photos by choosing a blank slate, basic frameworks or professionally designed themes
- Share photos in your choice of animated galleries created using Flash technology, including a spinning carousel and a book with pages that flip
- Enhanced support for working with raw image files from most digital camera models
- Automatically correct skin tone, lighting, color and contrast, and remove red-eye to keep you and the people featured in your photos looking their best
- Organize your photos and video clips by people, places or events with user-friendly visual tagging options
- Reliably back up your photo collection online, on a CD or both with the integrated backup service
- Assemble your movie in the new Sceneline, where you can drag and drop to arrange clips and add effects, perform seamless transitions, create terrific titles and more
- Capture and edit HDV footage in its native format to achieve the sharp, beautiful results you want
- Narrate the story in your own words for an extra-special personal touch
- Convert standard audio to industry-standard Dolby Digital Stereo for booming sound quality

- Burn your fully edited films to single- or dual-layer DVDs for smooth, reliable playback
- Completed movies can be viewed on virtually any handheld device, including cell phones, Apple® iPod™, and your PSP game system, so you can take your home movies with you on the road

Analyze Data Using Comprehensive Statistical Software

SPSS for Windows provides you with a broad range of capabilities for the entire statistical analysis process. With SPSS Base, you can generate decision-making information quickly using powerful statistics, understand and effectively present your results with high-quality tabular and graphical output, and share your results with others using a variety of reporting methods, including secure Web publishing. The intuitive interface makes it easy to use—yet it gives you all of the data management, statistics, and reporting methods you need to do even your toughest analysis. All this enables you to make smarter decisions more quickly by uncovering key facts, patterns, and trends.

Seamlessly enhance your capabilities when you combine SPSS Base for Windows with add-on modules and stand-alone software. See the related products list below.

TimerTools Software

Projectable Timers for Teachers and Trainers

Imagine this: You are doing a PowerPoint presentation and with one click, your whole screen turns into a huge hourglass to let your learners know how much time they have left to discuss an issue. Or, your class computer rings a "Time's Up!" alarm letting students know it's time to switch gears. Excitement mounts as your class or workshop participants race against the TimerTools stopwatch, attempting to break their prior record for a challenging task. It's all possible with TimerTools. TimerTools is the Swiss army knife for teachers and presenters: 13 essential tools in one! Whether you are presenting to a small class or a huge audience, TimerTools is your perfect solution for every presentation need: hourglass, analog clock, digital clock, alarm clock, multiple customizable alarms, seconds countdown timer, turn timer, interval timer, digital stopwatch, analog stopwatch, and split timer. Each attractive, scalable, customizable timer tool is super easy to use. Ideal for computer presentations or to turn your whole computer into a suite of powerful timing tools. For PC and Mac. **ETT • $29**

Empower Written Self-Expression and Vocabulary

Ability Level-Grades 1-8 • Interest Level-Grades 3-12

For struggling writers, translating thoughts into writing can feel overwhelming. Their writing often suffers from phonetic or inventive spelling, lack of richness, limited detail, and incoherence. These students need the word prediction program that has empowered more written self-expression than any other tool. Co:Writer is the only word prediction program to use Linguistic Word Prediction™ intelligence.

Meet Individual Student Needs

Writers at any writing level benefit from choosing the appropriate dictionary beginning to advanced

For students beginning to write independently, Co:Writer gives assistance with difficult or content-specific words only when needed

As a student's writing improves, supports can be adjusted or removed, moving the student into total independence

Expand Written Vocabulary for All Students

• The **eWordBank** expands core vocabulary by turning receptive vocabulary into productive vocabulary for more fluent writing.
• **Linguistic Revision** (only available with Co:Writer) helps students use enriched vocabulary while revising and editing.

Transform Hesitant Writers into Competent Writers

• Research-based strategies break the failure cycle. Students quickly regain confidence and motivation.
• Easy-to-use interface and tools guide correct phonetic spelling and build grammatically correct sentences as students type.
• The Setup Wizard provides easy personalization for individual writing needs and skills.

Improve Written Articulation on any Topic in any Genre

• Industry-standard **Linguistic Word Prediction** and FlexSpell™ persuade, describe or compare and contrast.
• The **eWord Bank** and included Topic Dictionaries give targeted vocabulary support when writing on any topic and in any genre.
• Genre Topic Dictionaries add additional vocabulary for purposes to explain, persuade, describe or compare and contrast.

Ability Level-Grades 1-8 • Interest Level-Grades 3-12

PRICING

IntelliTools Classroom Suite conforms to the principles of universal design for learning—multiple means of representation, expression, and engagement—to help students who are struggling with challenging concepts in math, reading, and writing.

The tools incorporate multimedia modeling, animation, and auditory support to assist students with challenging concepts. They take advantage of the infinite patience of the computer to provide as much time and practice as each student needs.

IntelliTools Classroom Suite supports the different ways students become engaged and motivated, whether through speech feedback, larger text, or the use of color. Students also benefit from instant natural feedback, and teachers can keep track of student progress.

Classroom Suite is also available in a Network version. Please call (800) 899-6687 for more information.

About ClozePro

Cloze activities are a well-established and proven way of developing reading, comprehension and vocabulary skills. Now there is a tool that enables you to create a cloze activity from any text in seconds!

- Create an activity with just a few clicks, using any text
- A rapidly growing range of free ready-made activities at www.LearningGrids.com
- Detailed reporting to track student progress
- Customizable interface for all ages
- Fully switch accessible for students with disabilities

To find out what ClozePro can do,
take the ClozePro Guide!

Activity text

Missing words grid
or pop-up window
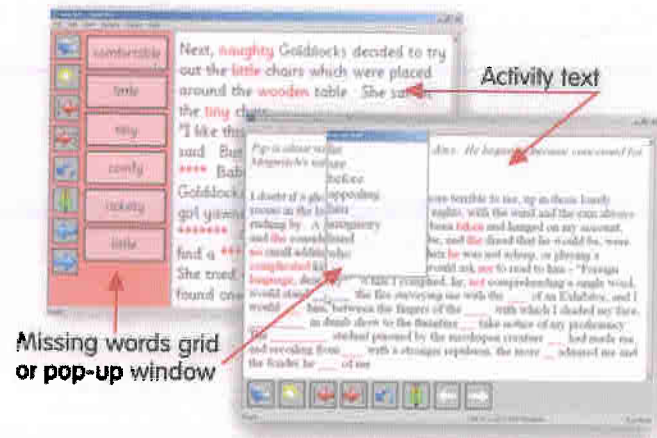

Click image to enlarge | Download CMYK TIF

Just type or paste in some text, choose the words you want to remove, and you're ready to go! When your students run the activity on the computer, a comprehensive report is produced so that you can track individual progress. Or you can print out a worksheet for the whole class!

It's easy to make different versions of the activity to fit the different ability levels in your class. You can remove whole words, phrases, parts of words or individual letters. You can use pictures and speech to support younger or struggling readers. You can even create multiple-choice tasks for older learners.

Anyone who has used Clicker will find the interface very familiar. Grids are created automatically and are supported by digital speech. It's easy to create a series of linked activities that students can work through at their own pace.

The grid can be displayed along the side, as a pop-up, or in the bottom part of the screen. Gaps can be shown in a variety of styles, including the option to show the shape of the words. You can even have pictures in the gaps. Gaps can be filled in any order, so that students can make the best possible use of context cues.

Students can work through a series of linked activities that can form the basis for a whole lesson. ClozePro tracks everything the student does, and you can access a full report for any student at any time, either on a stand-alone computer or across your network. This enables you to diagnose reading problems and track individual progress.

ClozePro is also great with small groups, and is very powerful with the whole class when used with a whiteboard. It offers a rich language development opportunity where students can discuss possible answers and argue their case.

As a ClozePro user, you'll also be able to register on our free website at www.LearningGrids.com. Here you'll find a growing library of ready-made ClozePro activities covering a range of curriculum areas.

To find out more about ClozePro, have a look at the ClozePro Guide.

Go to top ⌃

Who can use ClozePro?

Kindergarten children
Start with picture matching and progress to early word recognition.

Elementary school children
Younger learners can use picture and speech support, whilst older students can focus on longer, more complex texts.

Secondary school children
You can create activities for any curriculum area and use them with all your students to practice and reinforce learning, and even for exam revision.

Special needs

Ideal in any special needs context, ClozePro can provide differentiated activities tailored to a student's specific needs and is fully switch accessible.

Clicker
About Clicker 5

Winner of 6
BETT Awards
- the 'Oscars'
of British
educational
software,
voted for by
teachers!

Clicker is a writing support and multimedia tool - it enables you to write with whole words, phrases or pictures!

It is a very powerful tool and is incredibly easy to use, and supports every area of the curriculum.

Over 90% of primary schools in the UK use Clicker - and its use is rapidly growing in schools around the world.

To find out what Clicker can do,
take the Clicker 5 Guide!

To find out how Clicker can help *you*,
see Clicker In Your Classroom

Go to top

What is Clicker?

Clicker Writer is a talking word processor - you can write by using the keyboard, or by selecting letters, words or phrases in the Clicker Grid.

Clicker Writer

Clicker Grid
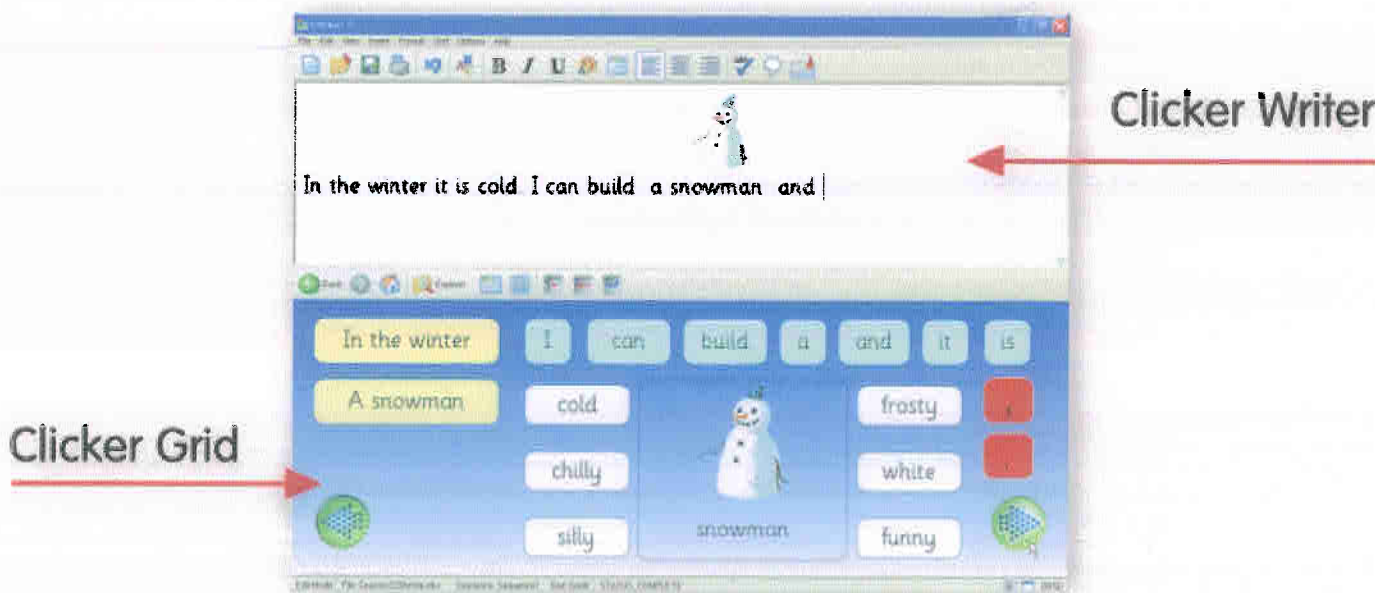

Download CMYK TIF

Picture support - Clicker comes with a huge picture library - you can write using pictures! You can use your own pictures or photos, too!

Some of the Crick Picture Library graphics

Speech support - to hear words before you write, simply right-click on them. When you finish a sentence, Clicker speaks your sentence to you!

Clicker 5 comes with realistic English speech. You can also record your own speech, or use foreign language speech!

Talking books - as well as creating their own written documents, children can create their own talking books! Plus you can create labeling activities, multimedia presentations and more!
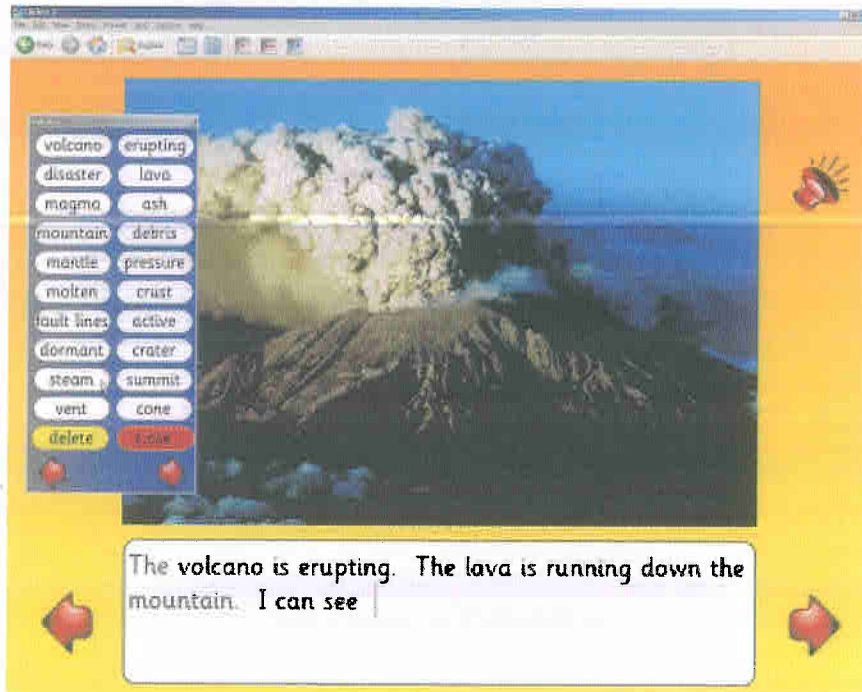

Download CMYK TIF

Video and animation - add these to your Clicker Grids to bring them to life! Our Clicker Animations CD contains animations to illustrate verbs, emotions and phrases.

FREE resources - our LearningGrids.com website contains thousands of ready-to-use teaching materials!

Plus there are many other Clicker resources available, such as Planet Wobble and Find Out & Write About!

Accessible - Clicker has a range of accessibility options for people who can't use a mouse or keyboard - so it's perfect for *all* abilities!

FREE updates

When you have Clicker 5, we provide free updates - with new features added all the time!

The latest update is version 5.2 and includes:

- More templates
- More pop-up keyboards
- Sort cells alphabetically
- Click on a cell to clear text
- Click on a cell to print
- Click on a cell to speak text from Clicker Writer
- Change pronunciation of words
- Word Bank tool opens the word bank for the letter you've typed
- Add your own words to the spellchecker
- Use spellcheckers for different languages
- Translate Picture Libraries into different languages
- Add keywords for pictures, so Instant Pictures appear for more words
- Picture palette enhancements - drag to change the order in which instant pictures are suggested; rename and hide pictures and folders; tab between them; works more like Windows; easily get pictures from your Desktop, My Documents – and your digital camera
- Even easier to register libraries
- Even easier to add pictures to grids

Overview

Kurzweil 3000™ is the comprehensive reading, writing and learning software solution for any struggling reader, including individuals with learning difficulties, such as dyslexia, attention deficit disorder or those who are English Language Learners.

With Kurzweil 3000, Kurzweil Educational Systems, Inc. is committed to helping schools meet the requirements of the No Child Left Behind Act (NCLB) and demonstrate success in the classroom for all students.

Kurzweil 3000 - Reading, Writing and Learning Software for Struggling Students – offering:

Access to Any Curriculum - The software can access virtually any information, whether it is printed, electronic, or on the Web. Because Kurzweil 3000 is also content independent, teachers in elementary schools, middle schools, high schools and colleges alike use it to help students succeed in the classroom regardless of curriculum or lesson plan.

Increased Reading Fluency - Educators and independent research have demonstrated that Kurzweil 3000 provides not only the tools students need to improve their reading speed and comprehension, but also the features that make it possible for them to learn and study independently.

Study Skills - With the aid of visual and auditory feedback, the software helps students keep up with assigned reading, learn critical study skills and successfully complete writing projects and tests. With it's robust study skills tools, Kurzweil 3000 facilitates active reading including: highlighting, text circle tools, annotations, Bookmarks, Voice Notes and Extract in order to create outlines, study guides, or word lists – all things that can improve their reading comprehension and retention.

Decoding Support - It then reads the words aloud to the student in clear, humanlike, synthetic speech, while a patented dual highlighting feature adds visual reinforcement. For students who have difficulty physically accessing curriculum materials, Kurzweil 3000 provides a digital means of engaging with text and can support students who use alternative methods for accessing the computer.

Writing and Self-Editing Tools - As students type, the software speaks each letter or word, so they can quickly re cognize and correct spelling mistake s. The Check Spelling As You Type feature underlines misspelled words in red. The audible spell checker and customizable word prediction further assist students with creating and modifying reports, essays and papers without teacher intervention.

Independent Test Taking – With Kurzweil 3000, students can independently complete worksheets, classroom tests and standardized tests with greater confidence and fewer mistakes. Students with accommodations can easily answer fill-in-the blanks, multiple choice, true/false, short answer, essay and other test forms while using a customized selection of writing tools, comprehension aids and visual modifications. Teachers can save documents with specific toolbars and feature locks, while also controlling which Kurzweil 3000 features are available to students during testing. Kurzweil 3000 supports the teaching and learning of reading skills that are necessary for meeting state and federal mandates. Kurzweil 3000 not only reads questions and answers aloud, it allows students to type answers directly onto the image of a scanned test, thereby offering more independence for both the student and teacher. In addition, the product is proving instrumental for both classroom and standardized assessments.

Product Line

The Kurzweil 3000 product line consists of three different products, all available either as standalone or network editions. Schools can mix and match these products within their environment based on their needs.

Kurzweil 3000 Professional Color

Provides for the creation and delivery of electronic documents. Documents can be scanned in color or black and white or opened from another application and saved into Kurzweil 3000 proprietary format. Kurzweil 3000 users who only have one copy of the product typically find it best to have a Kurzweil 3000 Professional which allows them to create and prepare documents as well as use the powerful reading, writing and learning tools.

Some of the features unique to the Kurzweil 3000 Professional version include:

- One-button scanning
- Optical Character Recognition (OCR)
- Edit Underlying Text
- Zone Editing
- Kurzweil Virtual Printer
- Open As PDF (OS X only)

Kurzweil 3000 Professional Black and White

Provides the same features as the Color Professional product, but documents can be scanned in black and white only. Documents scanned in color using the Professional Color product can be displayed in color in the Professional Black and White and LearnStation products.

Kurzweil 3000 LearnStation

Allows users to open previously scanned documents as well as other electronic documents. Kurzweil 3000 LearnStation provides the same powerful reading, writing and learning tools as the Kurzweil 3000 Professional product. Users who have more than one copy of the product often have a combination of Kurzweil 3000 Professionals and Kurzweil 3000 LearnStations.

Users can purchase the software in **"Kurzweil 3000 Lab Packs"**, which includes a mix of Professional and LearnStation software for school or district wide use.

For pricing information on the above products, please see the Kurzweil 3000 Pricing Page.

Network Edition

All Kurzweil 3000 products are available in network editions, where students can log on from any networked computer running Kurzweil 3000 and access their personal settings and files. Educators and network administrators can centrally track student usage and progress and control the number of licenses in use.

In addition, the new Remote License-to-Go™ feature allows granting of licenses to users' laptop computers, so users can access Kurzweil 3000 without being connected to the network. As a result, teachers and students benefit alike by accessing Kurzweil 3000 in or out of the classroom. For instance, if a teacher wants to take work home or have an IEP meeting with a student's parents to show Kurzweil 3000, or if a student needs to do homework, Kurzweil 3000 is available whenever and wherever they are.

Important Customer Notice

If you are eligible for a free upgrade to Kurzweil 3000 Version 10, you must have sent back the voucher in order to receive your free upgrade. If you have not yet filled it out, please do so and send it back in per the instructions on page 2 of the file. No automatic upgrades will be sent.

April 24, 2007

To Whom It May Concern:

The acquisition of an upgraded hardware, software, and peripheral configuration for the Student Multimedia Lab in C114 of the Teacher Education Center is necessary to fill a critical need for initial and advanced teacher candidates in the College of Education. A Multimedia Lab will advance the teaching/ learning process by providing pre-service and in-service teachers access to advanced technology, thereby promoting the mission of the College of Education and the University.

The College of Education Technology Plan identifies improving access to technology by students, faculty, and staff as one of its main objectives. A second equally important objective is providing classrooms with updated technology and multimedia. This initiative allows for the continuation of hands on learning experiences for our future teachers that begin in the education classrooms within the Teacher Education Center.

It is my hope that this initiative is funded. The National Council for the Accreditation of Teacher Education (NCATE) requires all teacher candidates to integrate technology as a tool for enhancing the teaching/learning process. The fulfillment of this grant will aid in achieving not only a requirement of NCATE, but an important goal of the College of Education.

Thank you for considering this request. If additional information is needed, please contact me.

Sincerely,

Vickie S. Gentry, Ph.D.
Dean, College of Education
