

**Student Technology Fee
Funding Request Form
Special Initiative Fiscal Year 2009-10
Northwestern State University of Louisiana**

**This document will not be accepted without complete information, detailed budget,
specifications of each piece of equipment requested and pricing.**

Prepared by: Michael E. Matthews For: NSU Libraries

College: _____ Campus: ALL Department: NSU Libraries

Where will requested equipment be located/installed/housed: Bldg. Virtual

Total amount requested \$ 500,000 Matching Funds: Yes No Department _____

Are property policies and procedures in place by the department for equipment requested. YES

Delivery to the Student Technology office located in Watson Library, Room 113. Date October 30th, 2009

1. Describe target audience.

The use of *e-content* from the enclosed vendors (**Gale-Cengage, NetLibrary, Films Media Group**) would directly benefit all students, especially those who take online courses or are unable to use the NSU Libraries during normal operating hours. By purchasing this *e-content*, the use of the NSU Libraries would no longer be limited to only physical access, and would truly become "24/7" and be consistent with the online learning mission of our university. Unlike paper-bound reference and/or circulating books this content will be accessed anywhere and at anytime with an Internet connection.

2. Describe project/initiative for which you are requesting funds.

We are applying for either the full or partial funding of the attached *e-content* collections. The panel of referees may select a combination of collections including according to either vendor or title. The NSU Libraries strives to offer the best and most current information sources to its students. However, *the print collections* of our three campus libraries are not available to students who are pressed for time, geographically remote, or physically disabled. Because of substantial budget cuts, our reference and circulating book collections have become outdated. For example, according to our 2008 Self-Study, the average publication date of our science collection is 1972. Our nursing and allied health collections have an average publication date of 1991, while business and social sciences are around 1968. **For more details on the age of the collection please see the PDF entitled "Age of the Collections."**

A. Continuing from our first and second proposals, we have more high-quality and recently published titles from Gale Virtual Reference Library. The reference books in this proposal do not duplicate any titles submitted in the previous proposals. With the committee's approval, our university's collection of the Gale Virtual Reference Library will grow to over 500 titles, providing online learners in every major the general and specialized information resources they need.

B. We include in this proposal a wide selection of electronic books from NetLibrary that are selected for their usefulness as supportive texts in a student's course work, and as intellectually stimulating research material. The attached spreadsheet details over 2200 NetLibrary books that support seventeen areas of NSU's undergraduate and graduate curricula and do not duplicate our current holdings. The titles are very recently published with copyrights from 2007 to 2010.

C. We also propose the purchasing of electronic audio-book titles from NetLibrary. These books can be downloaded in a variety of formats by any user with a laptop and then synced to a hand-held device (Apple, Sony, Samsung, Toshiba, San-Disk and other compliant manufacturers.) Please note that the titles fully support our University's curriculum as well, especially in the areas of the humanities, letters, social sciences, and foreign languages and literatures. This list of titles includes instructional programs for non-native English speakers who wish to improve their communication skills.

With the purchase of the E-Audio-Books collection, students will be able to download NetLibrary's Media Center which has tools for searching browsing, and personalizing their E-Audio-Book collection.

From the library's budget, a modest hosting fee of approximately \$500.00 will be paid to Gale-Cengage NetLibrary will license an Adobe Content Server system on annual basis for \$400.00. Access to the ACS will allow students to download their NetLibrary books and audio-books to any offline device, including personal computers and mobile hand-held devices.

3. State measurable objectives that will be used to determine the impact/effectiveness of the project.

By supplying an extensive collection of electronic books, electronic audio-books, and on-demand-video, we will achieve three objectives.

- 1) Offer students complete, accurate, and current information on a spectrum of topics directly related to their academic majors and course assignments.
- 2) Provide key support for *all academic departments that teach face-to-face, hybrid, or 100% online courses.*
- 3) Create a truly student-centered library which brings valuable information to its users who may not be able to access its collections.
- 4) Initiate the implementation of a comprehensive marketing campaign for the university libraries. We will alert all students and faculty of the new resources through a series of special events, instructional seminars, and outreach to the SGA, the RSOs, and the CALL program.

4. Indicate how each project objective will be evaluated.

We will assess the impact and effectiveness of the new electronic reference book collections through a series of student surveys, interviews, and focus groups.

Objective 1: Will be measured by the annual "Library Survey for Students". Respondents will answer questions relating to their overall satisfaction with the e-content including ease of use, convenience, and suggestions for improvement of services.

Objective 2: Will be measured by the annual "Library Survey for Faculty" which will ask faculty about their usage of the e-content in their courses, whether offered face-to-face or online.

Objective 3: Will be measured through two focus groups, one for students and the other for faculty. Focus group participants will be asked about their experiences in using the NSU Libraries, and how its services and collections could be improved for the future.

Objective 4: Will be measured by the feedback from a comprehensive library marketing campaign to be implemented with the cooperation of the Dean of Students and the department of Electronic and Continuing Education. The marketing campaign will be used to promote the e-content to current students, and for the recruitment of future students.

All objectives will be assessed through casual interviews of students, *prospective students, parents, and faculty concerning their awareness and usage of the e-content* and whether it meets or exceeds their expectations.

5. Provide a justification for funding of the project. Estimate the number of students that will be served per academic year and in what ways. Please indicate also any unique needs of the target group.

Every NSU student (9,500 FTE) who uses online library databases as part of their course work or to prepare for their professional career will benefit directly from the purchase of enclosed *e-content* collections. According to the 2007-2008 Annual Report for the NSU Libraries, the total number of database searches on the library website increased by **21.1% from 468,415 to 594,053**. This increase reflects not only the overall usage of online library databases, but our students' continuing hunger for remotely available and full-text information sources.

While the target group of this grant application is the entire NSU student body, students who are working toward degrees which are offered entirely online would find the *e-content* particularly helpful. NSU currently offers 17 online degree programs from the associate's to the master's level. These students do not have access to *reference and circulating collections* except through their local public libraries, which vary widely in quality and scope. Funding of this project would give these students the resources they need to be successful in their classes.

6. If funded, which NSTEP (<http://www.nsula.edu/nstep/NSTEP.pdf>) objective(s) will this funding of this project advance. How will funding of the project advance the University and College / unit technology plan?

The funding of this project would advance the following NSTEP Objectives:

Objective 1: To improve access to technology by students, faculty and staff.

Objective 4: To improve and proliferate the use of distance education within all colleges

If funded, this project would advance the following University Technology Goals:

1. *To attain accreditation for each eligible degree program by a Board of Regents approved national accrediting agency.*

Although every program at NSU is currently accredited, the e-content collections will provide instrumental support for the students who need *quick access to accurate and detailed* information on a spectrum of complex topics. In this way, the *e-content* will help insure the future accreditation of these programs, especially if they are offered 100% online.

2. *To develop a plan for a learning centered environment that reflects the "spirit" of the concept including distance learning technologies, innovative strategies and pedagogy, and a commitment to provide the necessary faculty and student resources to make this environment possible.*

As an innovative and learner-centered strategy, the *e-content collections* will provide students 24/7 access to high quality information sources which can be navigated and downloaded to their home computers. The Head of Serials, Media, and Interlibrary Loan is committed to developing a comprehensive online tutorial which will explain how to use the e-content collections.

If funded, the e-content collections would advance a key component of the NSU Libraries Technology Plan by assisting in the acquisition and implementation of electronic full-text information resources which can be shared by all students regardless of location.

7. List those individuals who will be responsible for the implementation of the project/initiative and indicate their demonstrated abilities to accomplish the objectives of the project.

Michael E. Matthews, Head of Serials, Media, and Interlibrary Loan, will coordinate the delivery and implementation of the Gale Virtual Reference Library and serve as point-of-contact between the NSU Libraries and the technical support teams of the selected vendors. He will also design an online tutorial for using the *e-content* collections. Michael has worked at Northwestern since 2004 and is responsible for both online and face-to-face dimensions of the library instruction program.

Gail Kwak, Government Documents Librarian and LOUIS Systems Administrator will coordinate the loading of the records of each title of the *e-content* collections into the NSU Libraries' online catalog. Gail has worked at Northwestern since 1998 and is primarily responsible for the integrity of both bibliographic and patron records. She will work closely with our technical processes librarian, Elizabeth Graves.

8. Describe any personnel (technical or otherwise) required to support the project/initiative.

Sonny Carter, Imaging Specialist and Information Systems Liaison will coordinate with the office of Information Systems on the configuration of security and firewall protocols. As the library's webmaster, he will also code the links to the *e-content* collections within the NSU Libraries website.

Elwin Ellis, Database Administrator will coordinate with Sonny Carter on the configuration of the proxy server so that students will be able to use their MyNSU username and password for easy access.

9. Provide a schedule for implementation and evaluation.

Once the purchase is made, the vendors will input the order and within 3 business days provide access to the selected collections. Within this time period, the above personnel will resolve any problems related to the loading of records, security and firewall configurations, and the use of the proxy server. A banner, including a link to the *e-content* collections will be placed on the NSU Libraries website. An email announcement will be sent to all students faculty and staff through Messenger. The entire process should not take more than *twenty working days* (Monday-Friday) from start to finish.

10. Estimate the expected life of hardware and software. Explain any anticipated equipment/software upgrades during the next five years.

All vendors maintain their own user platforms. Northwestern State University will not host any content on its own servers. No investment in hardware or software will be required.

11. Explain in detail a plan and policy that will be in place to ensure property security/controls for any equipment received through Student Tech Fee.

Because the e-books have an entirely "virtual" presence, and will be remotely accessed using the MyNSU username and password system, it does not require additional security or controls beyond those already provided by the university's Information Systems department.

12. Attach a detailed budget, including: specs., description, cost, state contract number, and vendor for each item; cost of outside support personnel; and a description of how the proposal will support University/College/unit resources (i.e., cash match, funds from other sources, or reallocation of existing hardware/software or other equipment. **All of the information requested must be attached or the request will not be accepted.**

PLEASE SEE ATTACHED

13. List two individuals and their letters of support for the project. The letters needs to be from unit's Dean, the appropriate Vice President or the SGA President.

PLEASE SEE ATTACHED
