Further Discussion:

Ms. Shirley Cashio addressed the issue that the March meeting had been designated as the latest opportunity to have changes reflected in the 2005-06 University Catalog. She stated that due to recent Board approval the College of Nursing was required to complete a curriculum change for statewide articulation modeling to be implemented in the Fall 2005. Ms. Cashio further indicated that the college's curriculum changes were dependent on the pending university core requirement changes. Dr. Bill Dickens stated that he was faced with the same issues concerning the Physical Education program due to state redesign and requested consideration also. Dr. Tom Hanson, Chair, proposed a special meeting to be held on April 19, 2005 (with the deadline for submission of proposals of April 12, 2005) to address proposed curriculum changes from the College of Nursing and Department of Health and Human Performance. Dr. Lisa Wolffe requested permission to also submit proposals for consideration at the April 19, 2005 special meeting based on the discrepancies in the LSC joint major programs due to departmental changes that had been approved by the Council at the current meeting. The LSC was also granted approval to submit proposals for changes to its joint major programs to keep them aligned with current department requirements. Note: Earlier in the meeting Dr. Heckaman had indicated that a proposal to make changes to SPED 5300 had stalled in the Teacher Education Council (TEC) due to discrepancies in the proposal documentation. The CRC approved a telephone poll to be conducted to address the proposed course changes to allow implementation for the Fall. Based on the decision to call a special meeting in April the College of Education will be allowed to submit the SPED 5300 proposed changes at that time nullifying the need for a telephone poll.
